

Defunding Cops: A Modest Proposal

There's a move afoot to defund police in some of the communist areas of the country. Ever since a repeat felon with *Fentanyl* and crystal meth in his bloodstream died in police custody in Minneapolis, "*Democrat*" politicians have fallen all over each other pandering to blacks, and one proposal is to defund municipal police departments.

This meets with strong approval among all black criminals, who hate cops because they interfere with their "*black lifestyles*." Drugs, auto theft, prostitution, drunk driving, dice games, driving without a license, burglaries, shoplifting, and many other pastimes practiced by the black criminal element become much more difficult when cops are around.

The current mayor of Los Angeles, Eric Garcetti is the idiot son of the LA District Attorney who guaranteed O.J. Simpson's acquittal by holding his murder trial in LA rather than Brentwood. Mayor Garcetti now vows to cut more than \$150 Million from LA's police budget next year. Similar *virtue-signaling* was proposed by mindless communists and pandering idiots on the *Minneapolis City Council*, and in New York City.

Here's my suggestion to police: If municipal authorities succeed in drastically cutting the police budget in your city, plan for the entire police force to GO ON STRIKE for three weeks. Have a plan in place to do so, and at a given signal, execute your plan without hesitation. Give them a glimpse of the future. Once you return to duty, make certain the mayor and city council are responsible for arranging their OWN security.

The nigras will kill a lot of people, but they do that anyway. This might teach a valuable lesson even to morons and cretins. Soon, the brighter criminals will recognize that *Sunset Boulevard*, *Hollywood Hills* and

other wealthy and leftist enclaves offer attractive targets for "*hitting a lick,*" and the dilettante residents will finally get a well-deserved "***good dose of n*ggers.***" With no cops, it will be like shooting fish in a barrel for the black criminal element.

The mayhem will eventually force each "blue" state's governor to call up the ***National Guard.*** The latter will need to be issued live ammo and will finally and reluctantly be given the authority to use deadly force just to make a dent in the problem. They will blame President Trump, of course, but even the inhabitants of ***Bora-Bora*** will know where the blame really lies, even if ***CNN*** and ***MS-NBC*** viewers do not.

Meanwhile, if you are a cop in LA or Minneapolis or New York City, get your resume` in order and your applications out to small and medium-sized towns and cities, where life is infinitely more civilized, the cost of living is much lower, and where communists do not hold elective office. You might even want to run for Sherriff...
