

# Trump's Valley Forge

by Earl P. Holt III

The six or seven weeks following the November 3rd National Election will be Donald Trump's "*Valley Forge*." It will be the supreme test of his presidency and maybe the supreme test of his life. It might become the battle that determines the survival of Rule of Law and the Constitution for generations to come.

The organized criminal element that pursued Trump through the *Mueller Investigation*, the phony Impeachment Hearings in the House, and the harassment he has endured over his taxes, will pursue him with equal vigor using equally fabricated charges if he is no longer Chief Executive. They will also go after Bill Barr, Secretary of State Mike Pompeo, Rick Grenell, Trump's family, and every other appointee that has been loyal to Donald Trump.

However, the "*Democrat*" vote-fraud machine overplayed its hand to defeat Trump in 2020 and in doing so, it left a long trail of incriminating evidence. If that evidence is successfully exposed through election audits -- **NOT RECOUNTS** -- in Pennsylvania, Georgia, Wisconsin, Michigan, North Carolina, Arizona, Nevada, and Minnesota, those who orchestrated it and everyone who participated in it will be in serious legal jeopardy, and the machine itself will be decimated.

**The Supreme Court has been given a unique opportunity to restore fair and honest elections for generations to come, and thereby reassure all honest Americans that their legitimate votes will no longer be subverted by treachery and chicanery. For years, the "*Democrat*" vote fraud machine has influenced the outcome of numerous important elections at all levels. Without it, the "*Democrat*" Party would long ago have become as obscure as the *Libertarian Party* or *Green Party*.**

Opportunistically, a number of RINOS like Mitt Romney and Chris Christie have suggested that President Trump should concede defeat in the great tradition of all those earlier "*gracious losers*" in the GOP, who can always be counted upon to reflexively and blindly follow the advice of our mortal enemies.

Both Romney and Christie have "*a lean and hungry look*," as Caesar once said of Cassius in Shakespeare's ***Julius Caesar***: Each would love to position themselves to inherit *Trump Nation* for their own presidential aspirations, but that's about as likely as someone describing Chris Christie as being either "*lean*" or "*hungry*."

Despite the efforts of RINOs, Donald Trump will continue to control the direction of the Republican Party for many years to come. Even if he were to be defeated in the *Electoral College*, only Trump, himself can designate his political successor, and it won't be any disloyal and back-biting RINOs like Romney or Christie. Trump supporters would NOT follow either, even on a bet.
