

WORST Idea of the Year

by Earl P. Holt III

One of the worst ideas I've ever heard is the recommendation that we Republicans, white nationalists and conservatives sit out the two January 5th, 2021 *Georgia Senate Elections*. I recognize the frustration of those who propose such an idea, but doing so **would be like severing your genitals to spite your wife.**

Those who make this recommendation are correct about one thing: We have been betrayed for years by cowards and self-dealers in the GOP, who prefer to live with massive "*Democrat*" voter fraud rather than be called "racist" for trying to end it. They have betrayed conservatives, white nationalists and the GOP rank-and-file more times than Peter betrayed Jesus Christ. Moreover, few bothered to lift a finger to defend President Trump while he was wrongly attacked by the savage wild dogs of the Deep State.

Those who are so naive and witless that they can't anticipate the evils wrought by a modern "*Democrat*" Party WITHOUT CHECKS AND BALANCES should never offer an opinion on anything. "*Democrats*" plan to stack the Supreme Court, end the Senate Filibuster, end the Electoral College, give statehood (and two U.S. Senate seats) to both D.C. and Puerto Rico, and implement environmental regulations that will make the mess in California look like a cake-walk. There's no recovering from such disasters, and you can bet massive voter fraud would continue unabated.

If President Trump's challenge to the fraudulent November 3rd election is not successful, a Republican Majority in the U.S. Senate will be **THE ONLY THING** standing in the way of an American *Bolshevik Revolution*. Those who think there's no difference between the two GOP

candidates and those from the ***New Communist Party*** -- sometimes mistakenly referred to as "*Democrats*" -- are so witless, they should be potted and watered twice a week.

The solution to ridding ourselves of self-dealers and cowards in the U.S. Senate -- especially those who aspire to membership in the GOP's vile "*political class*" -- is to "*primary*" the bastards out when they run for re-election. I wonder if those who now recommend boycotting the two U.S. Senate *Special Elections* in Georgia bothered to participate in previous Senate primaries? Those who complain the loudest are often those who do the least.

I recognize this was an unusual year in many ways, and that Georgia's U.S. Senate Primary Election couldn't be held until November 3rd, 2020 because of media panic over the COVID-19 pandemic. However, Georgia has sent a succession of self-dealers to the U.S. Senate in the past, and few have ever had to contend with legitimate primary opposition.

To boycott Georgia's two Senate *Elections* and idly sit by while two Bolsheviks are elected -- giving the *New Communist Party* a Senate majority to accompany the Presidency and a House majority -- is NOT a solution to the problem, it is the angry and unthinking tantrum of children.
