

## Repeating History

The *New Communist Party of the United States* (wrongly referred to as the "*Democrat*" Party,) has relentlessly pursued Donald Trump for nearly six years. Their conspiracy began the day Trump announced his candidacy for the presidency in 2015, and it didn't end even after he left office in 2021.

**Their blood-lust is reminiscent of the way Stalin pursued his old rival Leon Trotsky all the way to Mexico, where Trotsky was eventually assassinated with a pick-axe to the brain by Stalin's murderous NKVD thugs. All communists behave in this manner: They must destroy their political rivals, who know their weaknesses and "*where all the bodies are buried.*"**

The same phenomenon occurred in post-war Yugoslavia, where Tito hanged the heroic anticommunist General Draja Mihailovich after a phony show-trial, and in post-war China, where Mao forced Chang to the Island of Formosa. Likewise, Castro sent a team of assassins to pursue Fulgencio Batista to Portugal, but Batista fortuitously died of a heart attack two days before Castro's "*hit squad*" intended to murder him.

It is arguable that Senator Joseph McCarthy experienced a similar fate after exposing a vast network of Soviet spies in the Roosevelt and Truman Administrations. Likewise, an argument could be made that the predecessor of the *New Communist Party of the United States* (NCPUSA) was compelled to destroy Richard Nixon because Nixon won 49 states in the 1972 Presidential Election, after forging a political alliance that portended the end of the "*Democrat*" Party.

**The NCPUSA is no exception to the rule. They fear the truths that Trump can tell about the traitorous "*deep state*" they've strived to create, with**

**its globalist and socialist agenda. Their reaction is similar to the hysteria our "*political class*" exhibited when Trump courageously exposed their greedy and mindless enthusiasm for funding communist China's economic and military might.**

Really, there should no longer be any question that the so-called "*Democrat*" Party is about as "*democratic*" as the former Soviet Union, and is far more accurately perceived as a modern reincarnation of the original *Communist Party of the United States*, founded soon after the Bolshevik Revolution in 1917.
