

Apology

In the *Special Election Edition* of the **CITIZENS INFORMER**, e-mailed to CofCC Members in late December, I lavished praise upon President Trump's three Supreme Court nominees and included additional praise for Justices Clarence Thomas and Samuel Alito.

I even included a graphic by artist Jon McNaughton titled "***Defenders of the Constitution***," which depicted the five Justices presumed to constitute a conservative majority on the Court. It was anticipated they would stand heroically -- as the artist implied -- by somehow sanctioning the obvious theft of the November 2020 Presidential Election.

There is simply NO SUBSTITUTE FOR COURAGE: No matter how brilliant Trump's appointees may be and how exceptional their academic records were, those credentials are MEANINGLESS without sufficient courage. Sadly, the three Trump-appointed Justices -- so lavishly praised by myself and others -- were as useless as Jeff Sessions.

In contrast to Justices Clarence Thomas and Samuel Alito, the three were quivering cowards. They ran from any responsibility for reviewing the evidence of election fraud generated by the *New Communist Party of the United States* like Peter denied Jesus Christ. If they somehow interpret their judicial authority as permitting massive and systemic voter fraud, what earthly good is the Supreme Court?

Corrupt and leftist Supreme Courts in past years have routinely invented new and flagrantly unconstitutional "doctrines" out of thin air, as if they were the very "*Continuous Constitutional Convention*" the Framers intentionally rejected. Yet, the three Trump appointees disavow EVEN the authority to hear evidence of massive voter fraud resulting in the election of an organized crime figure to the presidency.

Their "*judicial philosophy*" is the equivalent of bringing a *Bible* to a gunfight!

Readers **WILL** be relieved to know that in 2021, the Supreme Court **WILL HEAR** the momentous national issue of whether or not college athletes must be paid a salary by their "*institutions of higher learning*," since this is such a profoundly significant "*Constitutional*" issue.

Likewise, the Supreme Court will also determine if "*married*" queers and perverts can force a Catholic adoption agency to honor their adoption requests, and the Court has also agreed to hear a case involving reparations for "*Holocaust survivors*," two clearly burning issues of profound Constitutional significance.
