

## Jeffrey Dahmer at Justice

Joe Biden's nomination of Kristen Clarke to head the ***Justice Department's Civil Rights Division*** illustrates how dangerous the "Democrat" Party and Biden Administration truly are. Both are in the pockets of black race-hustlers, renowned for their capacity to lie and Clarke is no exception. **Her confirmation would be like hiring Jeffrey Dahmer as a federal meat inspector!**

Control of the Civil Rights division of the DOJ determines how the federal government will litigate a host of sensitive issues such as race-based hiring and admissions policies. It may also have input in determining whether systemic voter fraud -- endemic to America's predominately black areas -- will be investigated and then prosecuted or ignored. It will also determine which conservative or white nationalist enemies will be illegally harassed, based on phony allegations of "*domestic terrorist activities*."

Clarke is an enthusiastic supporter of ***Black Liars Murder*** (a REAL terrorist organization!) and her delusional and racist world view is readily apparent when she claims that blacks are intellectually superior to whites because "***Melanin endows blacks with greater mental, physical and spiritual abilities — something which cannot be measured based on Eurocentric standards.***" (By the way, that's straight out of Louis Farrakhan and his *Nation of Islam*.)

Her statement about black "*superiority*" appeared in a letter to the ***HARVARD CRIMSON*** 26 years ago when she was an *affirmative-action* beneficiary at that once-great institution. She now claims her remarks were merely a parody in response to Richard Herrnstein's and Charles Murray's book ***The Bell Curve***, which marshalled the evidence of over 600 empirical studies consistently demonstrating a 15 point IQ disparity

between the white and black populations in the U.S. (It is clear Clarke neither read nor understood the book.)

I'm willing to concede the superior "*physical abilities*" of blacks based on their domination of professional sports, but I'm mystified about the evidence that must have convinced her of those superior "*spiritual abilities*" that supposedly characterize them. Maybe it's based on all that praying they do to win the *Lottery*, or the prayers they offer in court when juries are deliberating their fates during their endless criminal trials.

Her remarks were not a "*parody*" as she claims, but they DID have elements of humor. It takes a sense of humor to argue that a race that never invented the wheel or a written language is "*mentally superior*" to a race that split the atom, traveled to the Moon, decoded the molecular structure of DNA and wrote the Constitution and the Bible.

She somehow fails to explain why it is that mentally **INFERIOR** whites are frequently called upon to save her mentally **SUPERIOR** black race from natural disasters, crop shortages, genocidal wars and epidemic diseases. She also neglects to explain why so many of her fellow blacks are entirely dependent upon white taxpayers to feed, house, clothe and educate so many "superior" blacks and their illegitimate offspring each year in America.

Her claim is particularly startling, since the average black IQ across sub-Saharan Africa is about 40 points lower than the white average of 100, indicating profound retardation by white standards. In fact, the IQ disparity between blacks and whites in the U.S. **WOULD BE IDENTICAL TO DISPARITIES IN BLACK AFRICA, EXCEPT THAT MANY AMERICAN BLACKS POSSESS WHITE GENES THROUGH MISCEGENATION, A PHENOMENON THAT HAS SIGNIFICANTLY ELEVATED THEIR IQs.** Were

this not the case, the U.S. disparity would mirror that found in black Africa.

As a professional race-hustler, she would reflexively argue that IQ disparities between the races merely reflect differences in income and opportunity rather than innate differences in intelligence, and that the lower incomes of blacks are entirely attributable to systemic racism. She is unaware that white students from the LOWEST 20% of family income average higher S.A.T. scores than black students from the HIGHEST 20% of family income. (Ezekiel Dixon-Roman. "*Race, Poverty and SAT Scores.*" Columbia University, THE TEACHERS' COLLEGE RECORD, April of 2013.)

Whites who dare to acknowledge the conclusive evidence of superior white IQ levels are routinely vilified by the harpies of the Jews' Media and the empty-headed *Stepford Children* who prowl the halls of *academe*. Merely quoting the scientific evidence is denounced as "*racist*" and becomes a career-ender, as it recently was for James Watson, *Nobel Laureate* and co-discoverer of DNA's molecular structure. His demise was just one of many real-world examples of "*science-denying*" by leftists who pick and choose those conclusions they approve.

Yet, n\*ggers like Kristen Clarke can turn the empirical evidence on its head and make preposterous claims -- contrary to all facts and evidence -- and then avoid any criticism from the Jews' Media and phony "*civil rights*" organizations owing to their ***Black Skin Privilege***.

They are even considered for sensitive positions in the ***Justice Department*** by the organized crime figures and communist trash that comprise the Biden Administration.

Diogenes,

Athens
