

## ***Physician, Heal Thyself***

A piece of Third World garbage that washed up on our shores is now a **psychiatrist who admits to having lifelong fantasies of executing all white people with a gunshot to the head**. Her name is Dr. Aruna Khilanani, and she was recently invited to lecture at the ***Yale School of Medicine's Child Study Center*** on the subject of "*The Psychopathic Problem of the White Mind.*"

This presumably Iranian woman is a New York Psychiatrist with more problems than any of her patients could conceivably have outside of Bellevue Hospital's psychiatric ward. I don't know what kind of idiots invited her to lecture, but she should be stripped of her Medical License in the State of New York. Here are excerpts from her lecture followed by the time-stamp when they occur during its audio recording:

***"This is the cost of talking to white people at all. The cost of your own life, as they suck you dry. There are no good apples out there. White people make my blood boil."*** (Time stamp: 6:45)

***"I had fantasies of unloading a revolver into the head of any white person that got in my way, burying their body, and wiping my bloody hands as I walked away relatively guiltless with a bounce in my step. Like I did the world a fucking favor."*** (Time stamp: 7:17)

***"White people are out of their minds and they have been for a long time."*** (Time stamp: 17:06)

***"We are now in a psychological predicament, because white people feel that we are bullying them when we bring up race. They feel that we should be thanking them for all that they have done for us. They are confused, and so are we. We keep forgetting that directly talking about race is a waste of our breath. We are asking a demented, violent***

***predator who thinks that they are a saint or a superhero, to accept responsibility. It ain't gonna happen. They have five holes in their brain. It's like banging your head against a brick wall. It's just like sort of not a good idea". (Time stamp 17:13)***

***"We need to remember that directly talking about race to white people is useless, because they are at the wrong level of conversation. Addressing racism assumes that white people can see and process what we are talking about. They can't. That's why they sound demented. They don't even know they have a mask on. White people think it's their actual face. We need to get to know the mask". (Time stamp 17:54)***

Here's the invitation to the lecture:

Child Study Center Grand Rounds

*Presented by*  
Yale School of Medicine's Department of Child Study Center

**"The Psychopathic Problem of the White Mind"**

Aruna Khilanani, MD, MA  
Forensic Psychiatrist and Psychoanalyst

Date: April 6, 2021 @ 1:00  
Virtual Talk  
<https://zoom.us/j/97271063445?pwd=V3NqbkVPVnAwYTZidWVWaEFML2xNUT09>

Course Director: Andres Martin, MD, MPH

*There is no corporate support for this activity*  
This course will fulfill the licensure requirement set forth by the State of Connecticut

**ACCREDITATION**  
The Yale School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

**TARGET AUDIENCE**  
Trainees in child psychiatry, psychology, and social work, faculty, clinicians, scientists

**LEARNING OBJECTIVES**  
At the conclusion of this activity, participants will be able to:

- Set up white people's absence of empathy towards black rage as a problem.
- Understand how racism is part of the mind that white mind that arose during colonialism with a series of lies around violence.
- Understand how white people are psychologically dependent on black rage.

**NEEDS ASSESSMENT**  
Everyone is talking about race right now. Especially white people. And yet, white people seem to be losing it. The number of Karen and "It's my right to not wear a mask" videos are exploding. How do we understand this psychologically?

**DESIGNATION STATEMENT**  
The Yale School of Medicine designates this live activity for 1 AMA PRA Category 1 Credit(s)<sup>™</sup>. Physicians should only claim the credit commensurate with the extent of their participation in the activity.

**FACULTY DISCLOSURES**  
Aruna Khilanani: see attached  
Andres Martin: NONE

It is the policy of Yale School of Medicine, Continuing Medical Education, to ensure balance, independence, objectivity and scientific rigor in all its educational programs. All faculty participating as speakers in these programs are required to disclose any relevant financial relationship(s) they (or spouse or partner) have with a commercial interest that benefits the individual in any financial amount that has occurred within the past 12 months; and the opportunity to affect the content of CME about the products or services of the commercial interests. The Center for Continuing Medical Education will ensure that any conflicts of interest are resolved before the educational activity occurs.

I have argued for some time that the *affirmative-action* and race quotas practiced at Yale and other so-called "*institutions of higher learning*" merely grant credentials to people who have absolutely no business possessing them.

This woman is in desperate need of a psychiatrist and anti-psychotic medication, herself, and the fact that she is practicing psychiatry or lecturing anywhere is evidence of a very deep rot in the medical profession. She shouldn't be practicing psychiatry or lecturing in it, she should be under the care of a psychiatrist or even institutionalized.

At the very least, *New York State's Office of Professional Medical Conduct* should sue to obtain her list of clients and warn them by registered mail of her condition, in which case, they could then decide for themselves whether they wish to remain under her "*professional care*." Professional misconduct by medical professionals can be reported to the following authority:

***Office of Professional Medical Conduct***  
**New York State Department of Health**  
**150 Broadway, Suite 355**  
**Albany, NY      12204-2719**

*(We are grateful to Katie Herzog -- who writes on "wokeness" in the medical profession -- who provided much of the information contained in this article.)*
