

# Enough Guilt to Go Around

by Earl P. Holt III

We are definitely at a crossroads in this country: We can either continue our march down the "*road to serfdom*," or we can begin the difficult task of retaking our country from the communists and traitors who control the "*Democrat*" Party, more accurately referred to as the *New Communist Party of the United States (NCPUSA)*.

**However, America's decline is not solely attributable to the corruption and treachery of the NCPUSA. Many decent Americans have abdicated their civic responsibilities for decades, and our negligence has helped to precipitate the current disaster in many ways. In fact, we ourselves have actually created the opportunity seized upon by our ideological enemies to subvert and destroy America.**

We've passively sat on our hands while the Jews Media became totally dishonest, partisan and beyond reform: **yet, we rarely protested their bias or dishonesty** in *Letters-to-the-Editor* of offending publications, or threatened their sponsors with boycotts of their products in letter-writing campaigns. Many of us continue to watch *filtered* news rather than get our news from ***One America News Network*** or ***NewsMax***.

Parents of students at all levels have **studiously ignored the malignant indoctrination** and Marxist brain-washing found in the curricula of many public and private schools, such as "*Critical Race Theory*" or "*White Skin Privilege*." They hoped it would somehow go away, or that their kids would remain uninfected. **Few ever bothered to attend a PTA Meeting and complain, nor run for their local school board to reform curriculum.**

Voters in many states -- such as PA, WI, MI, AZ, NV, IL and VA -- must have realized that voter fraud and other electoral shenanigans routinely

occurred during important elections, but ignored this fact in hopes that it would cease. Since most voter fraud is perpetrated by blacks, **few complained to their state representatives or state senators about witnessing voting irregularities** out of fear of being called "*racist*."

Many of our Congressional delegations routinely feather their own nests and betray their constituents with support for inexcusably terrible legislation. Yet, we rarely hold any of them to account because many of us receive benefits from their "*earmarks*," so we give them a *pass*. Incumbent House Members are re-elected 98% of the time -- and U.S. Senators 90% of the time -- which only reinforces their perception that they are immune from the wishes of their constituents.

Racism in the form of "*affirmative-action*" and race quotas infect every sector of the nation -- industry, government and the military -- but we've **never held elected officials responsible for perpetuating this unconstitutional outrage**. Rep. Charles Canady (R-FL) submitted a Constitutional Amendment to ban race quotas several times in the 1980s and 1990s, but it always died in the *House Judiciary Committee* -- even under Republican majorities -- so he eventually retired in disgust.

We have frequently been **too lazy to properly inform ourselves** about the timidity and betrayal routinely found in votes by our Congressional delegations. Many of them regularly betray us with their cowardice and then hide behind "*procedural votes*" to confuse us and avoid taking a stance on vital issues. Most of us rarely support challengers in Congressional primary elections with our votes or financial support, which merely returns duplicitous Members to office.

There's plenty of guilt to go around, and it's high time those who have stayed out of the fray got involved in productive and intelligent ways. That doesn't mean occupying the Capitol Building, as benign and harmless as that may have sounded.

A well-intentioned Christian woman in a nearby town told me that prayer is the only way to save our country. I'm a great believer in the power of prayer, but I replied that I don't think God wants to see us just sit on our asses and expect Him to save us from Godless communists and the organized crime figures now subverting our federal government.

**I believe *God helps those who help themselves*, as the old adage states, but it's exactly the abdication of our civic responsibilities -- and the expectation that God or others will do the hard work for us -- that has brought us to our current disastrous state of affairs.**
