

A Brighter Future

by Earl P. Holt III

Americans used to be unique in their optimism concerning the future, a characteristic that often distinguished us from all other nations and cultures. Most Americans expected the future to be brighter for themselves and their posterity, while other cultures tend to have a more sanguine view of the future, characterized more by pessimism than by optimism.

We need to recover our former optimistic spirit, but there's only one way to achieve this goal: We must purge a great many traitorous fools from elective office at every level of government, and we must end the tyranny of our "*political class*." Both have betrayed us for decades.

A significant contributor to our national pessimism may be the **George Floyd riots** of 2020. N*ggers and communists from **Black Liars Murder** and **Antifa** engaged in wanton arson and savage violence in many **BLUE** counties, where it was pre-planned that rioters would never be held accountable for their crimes by the corrupt "*Democrat*" officials who tyrannize those areas and enable its criminals. Violent and communist terrorists were often released without bail and few were ever charged with their crimes.

The panic over the **ChinaVirus** and ensuing lockdowns have also contributed to the problem of pessimism. Many small business owners were ruined by "*Executive Orders*" that were both irrational, arbitrary and capricious. In most **BLUE** states, many churches were locked down while marijuana shops, abortion clinics and liquor stores were permitted to remain open. Most decent people were appalled that state and local governments could act in such an arbitrary and capricious manner under

the guise of "*public health*" and somehow manage to remain exempt from any consequences.

Another factor in this new American pessimism is the immunity from penalties that prominent "*Democrats*" invariably experience, exposing a "**dual**" system of justice. Hunter Biden sold his father's influence in the Ukraine and Kazakhstan, and then split the proceeds with his father without consequence. Hillary Clinton deleted 34,000 e-mails subpoenaed by the FBI without ramification. Eric Swalwell slept with a Chinese spy and accepted illegal contributions from her that originated in China -- then tipped her off when the FBI got *wise to* her -- and was **STILL** appointed to the *House Permanent Select Intelligence Committee*.

Likewise, New York Governor Mario Cuomo killed 13,000 elderly people by negligently warehousing COVID-19 patients in retirement homes, only to have his federal investigation quickly *deep-sixed*. The "Deep State" traitors who engaged in a coup against President Trump have never been brought to justice. Similarly, the 2020 arsonists and rioters in dozens of **BLUE** cities were never charged by "*Democrat*" prosecutors there. All of these contribute to a growing recognition that our system of justice is profoundly rigged, and our legal tradition of "*equality before the law*" has become an empty promise.

Efforts by the *New Communist Party of the United States of America* (NCPUSA) -- often mistakenly called "*Democrats*" -- to **destroy the Constitution** are also very unsettling to honest and law-abiding Americans. The NCPUSA has already purged all religious references from public life by subverting the *First Amendment* with "*interpretations*" that would enrage its Framers. It has also attempted to overturn the *Second Amendment* for 50 years without benefit of a *Constitutional Convention* or *Constitutional Amendment*.

Now that the NCPUSA controls both Houses of Congress and the White House as well, it has boldly attempted to subvert **RED** state efforts to ensure clean elections. In particular, it is currently attempting -- through federal legislation -- to make the electoral shenanigans that subverted and stole the 2020 Presidential Election permanent features of every election. These include trampling on safeguards such as the traditional county authority to purge "*inactive*" voters, require adequate I.D. during voter registration and when voting, restricting mail-in balloting, prohibiting same-day voter registration and regulating vote-harvesting.

Our **educational system** has become a laughingstock among serious nations. It's been subverted by Marxists and other idiots who promote Cultural Marxism in the form of ***Critical Race Theory*** by substituting it for Shakespeare, Greek and Roman History, writing skills, mathematics *with correct answers*, and the accumulated wisdom of 4,000 years of Western Civilization. Meanwhile, America continues to decline in international assessments of learning skills, as evidenced in annual reports by the ***Program for International Student Assessment*** (PISA.) (We've also dodged the embarrassment that would have resulted from English being one of PISA's test subjects.)

Americans are also dismayed by truly staggering **fiscal mismanagement** by "*Democrats*" and some witless Republicans, who are planning to spend over \$7 Trillion in 2022, with a federal Budget Deficit of about half that figure. The pressure on the *Federal Reserve Open Market Committee* to "*monetize*" those immense expenditures -- that is, print new money out of thin air to finance them -- are creating unmistakable inflationary pressures that are well on their way to generating double-digit inflation. Inflation rose 5.4% in June, alone, and is becoming increasingly evident in most domestically produced goods, especially lumber and food.

Sophisticated citizens are equally appalled at a subversive and criminal "**Deep State**" staffed with communists and treasonous "*Democrats*." Its

members clearly were given a "**green light**" to attempt an ongoing coup against President Trump by perjuring themselves in front of four FISA Courts in order to fraudulently obtain warrants to spy on Trump and his administration. It is also apparent that staffers of Trump's own *National Security Agency* were able to bring false charges against Trump in order to help Impeach him, and did so with impunity.

Patriotic Americans are also appalled that the illegitimate regime in Washington has created a **tsunami of illegal immigrants**, and has done so intentionally. The Biden regime has discarded President Trump's highly successful policy of "*Remain in Mexico*," and substituted the failed Obama policy of "*Catch and Release*." The latter permits the dregs of the Third World to enter without COVID vaccinations, and then jets them around the country where they can't be located.

However, the issue of greatest concern to honest Americans is the total subversion of our electoral system. Anyone with a brain can see that the 2020 Presidential Election was stolen by "Democrat" voter fraud orchestrated at all levels of government, federal, state and local. It is equally apparent that "Democrats" at every level of government are doing everything in their power to obstruct, impede and subvert legitimate attempts to audit the 2020 Presidential Election wherever those audits are taking place.

If Americans do not exhibit the degree of optimism we did in most prior decades, it's very easy to see why: We are being governed by corrupt, incompetent and traitorous criminals, all of whom should be locked away in prison with the black criminal element they have enabled and pandered to so enthusiastically.
