

Hillary's Legacy at the FBI

by Earl P. Holt III

2021 has been a tough year for the FBI, whose reputation now bears scant resemblance to that of the once highly-respected and celebrated U.S. law enforcement agency in its first 90 years. The *Assistant Special Agent in Charge* of its *New Orleans Field Office*, a lesbian named **Amberly Boyle**, was recently arrested for domestic battery of her "wife."

The *St. Tammany Parish Sherriff's Office* responded to an emergency call about a domestic altercation, and ended up arresting Boyle and charging her with misdemeanor domestic abuse battery. This makes Boyle the second agent in the FBI's *New Orleans Field Office* to be arrested in the summer of 2021.

Amberly Boyle

Less than two months before, **Special Agent David Harris** was charged with myriad counts of sex crimes against many young

children in Louisiana and other states, which took place over the course of many years. **An example of how clueless and sadly misguided the FBI has become is that it assigned Harris to child pornography cases!**

In July, FBI Agent **Richard J. Trask** -- who was instrumental in investigating and arresting the idiots who conspired to abduct Michigan Governor Gretchen Whitmer in 2020 -- was himself arrested for beating the hell out of his wife after they attended a "*swingers' party*." (That's where couples share their spouses sexually with other couples.) Trask was charged with felony domestic violence and faces a maximum sentence of 10 years.

In addition, there is an on-going scandal involving the **FBI's Las Vegas Field Office**, where routine drunkenness, *hangover naps* during working hours, systemic sexual harassment and personal retaliation are alleged to be rampant among its upper echelons. **Not surprisingly, the FBI's Las Vegas Field Office is where the myth was concocted of "white supremacists" conspiring to masquerade as Black Lives Matter rioters in order to "frame" BLM.**

All those sexual shenanigans may explain why the FBI was too busy to investigate the massive and systemic vote fraud that occurred in last November's Presidential Election. The misbehavior of many FBI Agents is also an indication that the strict character screenings once used to vet prospective FBI agents were discarded long ago.

Bill Clinton's **REAL** Attorney General was Hillary Clinton and not Janet Reno, who was merely a "*front man*." (**Pun intended.**) The Clinton Administration hired thousands of FBI Agents in the mid-1990s, which was probably when the rot and subversion began the decline of the world's foremost law enforcement agency.

The Clintons converted the FBI into an organization whose upper echelons would eventually perjure themselves in order to obtain four FISA court warrants to spy on President Trump and falsely charge him with "*colluding*" with Russia to steal the 2016 Presidential Election. They also engaged in treason, in what was clearly an attempted *coup*.

Hillary Clinton is a real, live psychopath, and the individuals with whom she staffed the FBI (and Justice Department) were exactly the kinds of people that no predecessor at the FBI or DOJ would ever have considered hiring. She hired n*ggers, communists, pederasts, traitors, queers, lesbians and power-hungry thugs, the sort of people who wouldn't survive their screening by a small-town police department.

Their progress was clearly expedited through the FBI based on their demonstrated loyalty to the *New Communist Party of the United States of America*. That's how we ended up with pathologically corrupt people like Jim Comey, Robert Mueller, Andrew McCabe, Peter Strzok and Lisa Page. It's also how you get the kinds of trash mentioned earlier.
