

Biden's America's Dilemma!

by Earl P. Holt III

When American officials accept bribes or "*emoluments*" from foreign governments, they may become wealthier but they also become vulnerable to blackmail by the SOURCES of those bribes.

That's why Russia's Vladimir Putin preferred Hillary Clinton in 2016: Putin and the criminals who run Russia recognized the "*Democrat*" Party's organized crime wing consisted of people like themselves, with whom they could "*do business.*" Hillary proved that as Secretary of State in 2010, when she sold Russia 20% of precious U.S. Uranium reserves in return for tens of millions in contributions to the ***Clinton Family Crime Foundation*** by Russian "*Oligarchs.*"

Finding himself the victim of extortion is exactly the dilemma in which Joe Biden currently finds himself *vis a vis* Russia and its thuggish leader, Putin. This offers a reasonable explanation why Biden repeatedly failed to take necessary and effective measures to prevent or deter Russia's invasion of the Ukraine. Putin is blackmailing Biden over the *Biden Family Crime Syndicate's*** illegal sale of influence in Russia while Biden was Vice President.**

In 2019, the ***Office of Homeland Security*** and the *Senate Governmental Affairs Committee* revealed that on ***Valentine's Day*** in 2014, one of Hunter Biden's firms was wired \$3.5 Million from Yelena Baturina, widow of a corrupt billionaire and former Mayor of Moscow named Yury Luzhkov. She and her late husband accumulated the Rubel-equivalent of billions of dollars in bribes from awarding public construction contracts in Moscow. Her \$3.5 Million wire transfer went to Hunter Biden's firm, ***Rosemont Seneca Thornton***, a spin-off of Hunter Biden's ***Rosemont Seneca Partners.***

Yelena Baturina's \$3.5 Million "*valentine*" was a *quid pro quo* payment to Hunter Biden and his partners for illegally setting up a fraudulent account at *J.P. Morgan*, through which Yelena Baturina was later able to **LAUNDER \$400 Million** of her late husband's ill-gotten gains using American banks. She was desperately attempting to avoid seizure of her assets by Russian officials because she was under investigation in Russia and facing criminal indictments there. She eventually fled to London.

Evidence that Joe Biden is being extorted by Putin has been clear throughout his presidency. The first thing Biden did as president was shut-down the *Keystone XL Pipeline* and prohibit exploration and fracking for gas and oil on public lands. This immediately ended U.S. energy independence and drove up the world price of oil. It also created a windfall for Russia and Vladimir Putin, whose oil and gas exports have generated *windfall profits* after dramatically rising in value.

Since the U.S. must currently import \$700 Million worth of Russian oil per day owing to Biden's U.S. energy policy, it is clear that Biden's energy policy helped FUND Putin's invasion of the Ukraine.

Soon after killing the *Keystone XL Pipeline*, Biden then **APPROVED** Russia's ***Nord Stream natural gas pipeline*** supplying many NATO countries such as Germany. As the Trump Administration and the Reagan Administration before it wisely recognized, Russian natural gas supplies to NATO countries would inevitably be used as leverage to manipulate Western nations and weaken the bonds of NATO. This is exactly what has happened, and it was painfully evident in Germany's initial reluctance to come to the aid of the Ukraine following that nation's invasion by Russia.

Evidence that Biden is being extorted by Russia is also suggested by America's own response to the Russian invasion of the Ukraine. Russia began to amass tens of thousands of soldiers on the Ukraine's Eastern Border beginning in April of 2021. The Biden Administration ignored

Russia's growing concentration of troops, and focused instead on its higher priority of indoctrinating America's armed forces with *Critical Race Theory* and placing women, *transgendered* circus freaks and queers in command of elite combat units.

The Biden Administration's response to the invasion of a sovereign nation by Russia was to impose a few ineffective economic sanctions that avoided impacting Russia's energy sector. Their lack of effectiveness was demonstrated when Russia ignored Biden's sanctions and invaded the Ukraine despite his threats. Biden's weak and ineffectual response was reminiscent of the Obama regime when Russia previously invaded the Ukraine back in 2014: Obama sent them blankets instead of desperately-needed arms.

What the U.S. should have done was arm the Ukraine LAST SUMMER with defensive weapons such as "Stinger" Missiles, "Javelin" Anti-Tank Weapons and "Harpoon" Missiles. The Stinger "Surface-to-Air" Missile and Javelin Anti-Tank Weapon are the reason primitive goat-herders in Afghanistan successfully drove out the invading Soviet Army in 1989, after a decade of Soviet occupation.

Stingers now cost about \$38,000 per weapon, but they can successfully shoot down Russia's \$40 Million jet-fighters, a very economic trade-off for the U.S. and an unsustainable cost for Russia. *Stingers* are equally deadly against Russia's "*Hind*" helicopter gun-ships that now cost \$36 Million. The only *Stingers* and *Javelins* the Ukrainians currently possess are the few sent to them by President Trump.

In other words, contributing a timely supply of America's small and hand-held, *state-of-the-art* weapon systems to the Ukraine might well have deterred the Russian Army in its tracks. **The U.S. federal government currently spends \$685 Million per hour**, so a modest expenditure of a couple of billion dollars in high tech arms to the brave citizens of the

Ukraine could have effectively deterred Putin's forces soon after they crossed the Ukrainian border.

That is, if Joe Biden weren't leading the free world from behind and wasn't the victim of Putin's blackmail...
