

# Inevitable Decline

by Earl P. Holt III

When blacks gain control of a large U.S. city, its fate is permanently sealed and it immediately begins to follow a predictable and irreversible pattern of decline. This is true of dozens of our largest urban areas -- once considered the "*gems*" of our civilizations -- which are now dangerous and squalid zones of violence, hopelessness, drugs, welfare, unemployment, illiteracy and mismanagement.

This describes Chicago, Baltimore, Detroit, Milwaukee, Minneapolis, Atlanta, Philadelphia, Cleveland, St. Louis, Los Angeles, Memphis, New York City, Little Rock, New Orleans, Houston, Washington DC and dozens of other **BLUE** cities, too numerous to mention. None of the black officials in these cities have even a hint of a shadow of a clue how to reverse their decline, despite much time spent pontificating in front of microphones and TV cameras. New York's clueless new mayor, Eric Adams, gives the impression of having won a contest to find the dumbest man in the city's five boroughs and then crown him mayor.

Most of these cities are defined by **violent crime** which makes them areas to be circumvented unless absolutely unavoidable. The vast majority of them set new records for murder in 2021, and many set records for other violent crimes such as armed robbery and car-jacking. **Chicago** is a good example: it cut about \$76 Million from its police budget in 2021 -- while providing security details for public officials -- then set all-time records with 834 murders (according to the Cook County Coroner.) It also experienced 1,800 car-jackings, an increase of 32% from 2020.

These cities are also defined by **dismal public school systems** that squander enormous sums of money but fail to educate or graduate their

students. A recent standardized test from the **Baltimore's Patterson High School** revealed that less than 2% of its *High School* students could read at their grade level, and 77% read at the Kindergarten or Elementary School level. Baltimore spends more than \$16,000 per idiot each year, so funding is clearly **NOT** the problem. The actual problem is that most of the black students, teachers and administrators in large, public schools systems have IQs lower than their waistlines. ("***I is a teacher.***") Most black teachers and administrators are no more capable of imparting an education than they are capable of performing brain surgery.

These cities are invariably defined by high levels of **graft and corruption**, which require large amounts of tax revenues to fund. **Detroit** is typical, and has a long history of black city officials -- mayors, police chiefs and scores of city councilmen -- who have gone to prison for demanding kick-backs on construction projects, accepting bribes for licenses, and who have embezzled or misappropriated public funds. Detroit officials have kept the U.S. Attorney in Detroit and the Wayne County State's Attorney very busy for decades. Cleveland, St. Louis, Memphis, New Orleans and Washington are no different.

A great deal of attention was recently given to America's **deteriorating infrastructure** when the Biden Administration's "***Infrastructure Bill***" passed in 2021. Very little of its \$1.7 Trillion price tag will actually target infrastructure because it was really a spending bill to enrich political allies. Yet, America's infrastructure really is in serious decline, especially so in our large cities. One reason for this is that for many decades, tax revenues have been diverted from maintaining or replacing bridges, roads, water mains, signage, streets and sidewalks, and ended up being diverted to political allies of black officials. These take the form of consultancies, construction contracts, social programs, the hiring of relatives and the funding of their pensions.

Another characteristic that helps define these cities and others like them is **black voter fraud**. The systemic voter fraud transpiring in Detroit, Milwaukee, Minneapolis, Atlanta and Philadelphia contributed to the theft of the 2020 Presidential Election, a fact that has been exhaustively documented. Scrutiny of their 2020 returns revealed turnout rates of 120 percent to 130 percent in most of them. Vote fraud has helped turn formerly **RED** states into **PURPLE** or **BLUE** states, and at the local level it has ensured the perpetuation of corrupt and incompetent blacks in public office, whose graft and corruption merely accelerate the decline of their cities.

A final defining characteristic shared by each of these cities is the failure of black public officials to accept **ANY** responsibility for their decline. They are all masters of **endless excuses**, routinely offering lies for their own failed policies. For example, among the excuses many offer for exploding violent crime rates are the COVID-19 pandemic, too many guns, systemic racism and Donald Trump. Of course, the true causes of violent crime in these cities are light sentencing of dangerous felons, early release from jail, minimal or no bail at pre-trial release hearings, the defunding and demonizing of police and restrictive gun control ordinances that prevent law-abiding citizens from defending themselves against predatory black savages.

**There does not appear to be any light at the end of the tunnel that might work to reverse these trends and usher in some kind of renaissance. There are no political or cultural forces at work in these BLUE cities to halt their decline. Many of them increasingly appear to resemble Haiti or Zimbabwe, or some other equally hopeless and squalid shit-hole rapidly being destroyed by blacks. Sadly, no amount of federal money could slow their continued decline.**
