

Real Jungle Fever

I haven't watched the ***Academy Award*** presentations in 40 years, and wouldn't watch them even if I were nominated for an award. Ever since Hollywood and the ***Academy of Motion Picture Artists*** was taken over by n*ggers, communist Jews and queers, I've avoided the award presentations like the plague and rarely watch their films, either.

Thus, I was surprised to wake up Monday the 28 to endless stories and facile opinions about Will Smith *bitch-slapping* one of the ceremony's hosts, Chris Rock. Chris Rock had insulted Will Smith's wife in a tasteless and clumsy attempt at humor, so Smith strolled onstage and "*sucker-slapped*" Rock's face and twice followed up his assault with the "*F-word*." It was a "*black-thing*," and exactly how lower-class n*ggers resolve any dispute when they aren't armed.

This tawdry episode was a valuable lesson for all the dumb n*gger-lovers and apologists for black misbehavior out there, who are stupid enough to think "***race is a false construct***" and that blacks and whites differ only in skin-color. Those of us with far more experience recognize that n*ggers are violent, and it makes no difference what their income is or how much they are admired publicly. They **ALWAYS** regress to ghetto behavior because it's in their DNA. (Just look at O.J. Simpson.)

If any white person had done what Will Smith did, he would immediately have been arrested for assault and battery and led from the room in handcuffs. That did NOT happen to Will Smith, who is immune to such sanctions by virtue of ***N*GGER SKIN PRIVILEGE***. Its most recent illustration involved Jussie Smollett's release from jail after serving only six days of a five-month sentence that took Chicago **FOUR YEARS** to finally achieve.

Stupid people having little experience with *Africanus criminalis* are busily promoting the idea that the incident was "*contrived*" to generate publicity for the event. My Ph.D. in Nigrology allows me the advantage of a more sophisticated understanding of their behavior, much like Jane Goodall's unique understanding of the primates she studied. Apologists who attempt to contrive an excuse for Will Smith are merely doing what all n*ggers try to do: keep one of their own out of jail and camouflage their natural inclinations toward violence.

Will Smith's assault was no different than the behavior of the vast majority of n*ggers all across America. They settle their differences with violence, because that is their primitive and unevolved instinct. That's why there were 834 murders in Chicago in 2021, and the U.S. records for murder in 2021 in most of our large urban areas dominated by n*ggers.

To quote an old African proverb, "*the leopard cannot change his spots.*" Neither, it appears, can New World Apes.
