

About **Bloody** Time !

by Earl P. Holt III

A pro-abortion "*feminist*" clerking for one of the leftist Supreme Court Justices has leaked a draft of what may well be a decision overturning ***Roe v. Wade***, the 1973 abortion decision. It was leaked to the leftist liars at ***POLITICO*** to either inspire a storm of protest to intimidate the majority, or else prompt the Biden Administration to pack the Supreme Court and reverse it.

The greatest fear of "***Democrats***" and other communists has been that a conservative Court might eventually overturn the one decision that comes as close to a *religious sacrament* as any of them will ever observe: that is the "*right*" to murder one's own innocent and unborn children, found in our current abortion-on-demand decision following ***Roe v. Wade***.

America's leftists suddenly demand that the Supreme Court adhere to "*precedent*," or what is known in legal circles as *Stare Decisis*. That's the principle that any court -- and the Supreme Court in particular -- should be restrained by strict precedent and not "*legislate from the bench*" by inventing new Constitutional doctrines. It implies that courts are obliged to follow the decisions of prior courts to demonstrate continuity and the legitimacy of our legal system.

Despite the shrill rhetoric of the left, however, ***Roe v. Wade*** created "*Constitutional Law*" from thin air, it overturned the abortion statutes in all 50 states, and it reversed 182 years of precedent at the Supreme Court. ***Roe v. Wade*** epitomizes the total abandonment of *stare decisis* or precedent.

If ***Roe v. Wade*** were reversed, it would not represent "*judicial activism*" or a failure to follow precedent. Instead, it would be a return to the ***status quo ante*** before a corrupt, incompetent and politicized court -- dominated by leftist scoundrels -- made a mockery of "*Constitutional*" Law by legalizing infanticide-on-demand!

Such a decision by the Court would merely return the deciding of this momentous national issue back to each individual state, where state legislatures may determine their own abortion policies. **BLUE** states will no doubt perpetuate the sacrament of infanticide, and most **RED** states will strictly regulate it or possibly prohibit it.

In any event, such a decision will be far more faithful to federalism and the Tenth Amendment than ***Roe v. Wade***.
