

(The Biden Administration has included \$7.5 Billion funding in its Fiscal Year 2023 Budget to land a woman and "*person of color*" on the Moon. I recommend they send Staci Abrams.)

Niggress On The Moon

Russia invaded the Ukraine
but there'll be a nig on the Moon;
The whole damned world has gone insane
but there'll be a nig on the Moon.

China owns our president, and
we'll have a niggress on the Moon;
Inflation rages through the land
but there'll be a nig on the Moon.

Our president's a drooling fool
but there'll be a nig on the Moon;
Biden is China's valued tool
but there'll be a nig on the Moon.

America's become like France
but there'll be a nig on the Moon;
Joe Biden often shits his pants
but there'll be a nig on the Moon.

We're 30 Trillion bucks in debt
but there'll be a nig on the Moon;
Our bankruptcy's an even bet
but there'll be a nig on the Moon.

Our southern border is a sieve
but there'll be a nig on the Moon;
the Third World's dregs come here to live
but there'll be a nig on the Moon.

**Elections are now wrought with fraud
though there'll be a nig on the Moon;
yet, real reforms are soon outlawed
but there'll be a nig on the Moon.**

**Some cannot define a "*woman*"
but there'll be a nig on the Moon;
our kids are taught girls are like men
but there'll be a nig on the Moon.**

**Large cities are no longer safe
but there'll be a nig on the Moon;
it's south Chicago we should strafe
but there'll be a nig on the Moon.**
