

America's Failed Experiment

by Earl P. Holt III

For nearly 160 years, America has been engaged in an experiment to determine whether a dull-witted, primitive, superstitious, tribal and morally deficient race can successfully adapt to a complex, modern society if given the full benefits of citizenship. More specifically, we've attempted to determine if a race that has never invented the wheel or a written language can **successfully** assimilate into a modern civilization that has split the atom, written the Constitution, landed a man on the Moon, and discovered the molecular structure of DNA.

Most authors have shied away from this existential question because its answer is glaringly obvious to anyone with a brain. They fear assaults by the Jews' Media and social ostracism from the *Stepford Children* who enforce political orthodoxy in the vile cesspool known as "*social media*." However, the answer is clear and the evidence is in: America has been no more able to successfully assimilate the vast majority of African blacks into our modern society -- as productive and contributing members -- than ancient *Alchemists* were able to convert lead into gold. As the brilliant Jared Taylor has written, "***People create cultures, cultures do not create people.***"

Our well-intentioned but misguided experiment with *egalitarianism* has failed pitifully. Yet, the failure of blacks to successfully assimilate, after hundreds of years of exposure to white civilizations, is not the fault of whites or "*white privilege*" or "*systemic racism*" as most race-hustlers and their apologists allege. The fault lies with blacks themselves who, if left to their own devices, rapidly cultivate a violent and squalid sub-culture displaying the lowest imaginable societal standards. So far, this phenomenon has proved to be irreversible and even worse, most are too stupid to recognize there even *IS* a problem.

Whites aren't perfect, but they are industrious, creative and mostly law-abiding. These offspring of religiously devout European ancestors are probably the only people in recorded history who have willfully expended blood and treasure on altruistic wars of principle to help liberate other civilizations, including even those of other races. Also unique in the annals of history, we have usually rebuilt the economies of those whom we defeat. Moreover, whenever there's a catastrophic epidemic or natural disaster in the Third World, it is white Christians who inevitably come to the rescue of complete strangers of any race.

In contrast, the *stone-aged cultures* created by blacks have remained unchanged and unevolved for hundreds of thousands of years, except where they have benefitted from contact with whites or colonization. It is no coincidence that even in a modern, industrialized society, the *law of the jungle* still prevails in **EVERY** overwhelmingly-black area in America.

America transferred the full range of rights, privileges and immunities to blacks with the **Civil Rights Act of 1866**, ended *separate-but-equal* institutions among the races with **Brown v. Board** in 1954, declared a **War on Poverty** by creating trillion-dollar per-year welfare programs targeted at blacks, enacted endless civil rights legislation -- such as **The Fair Housing Act** -- and even adopted **racial preferences** for blacks in employment and admissions. **With the possible exception of the Egyptian Pyramids, no society has ever expended so much effort and so many scarce resources on a "public good," but received so little benefit in return.**

In various attempts to help blacks assimilate, America has futilely wasted at least \$25 Trillion on "*urban welfare programs*," trillions of dollars on school desegregation, and trillions more on decades of programs to eliminate the persistent academic "*achievement gap*" between blacks and whites. We have even adopted unconstitutional

racial preferences that grant special advantages to blacks in employment opportunities and school admissions. Meanwhile, universities, the military and government at all levels have imposed Orwellian "*speech codes*" to stifle any criticism of black behavior, no matter how egregious. Likewise, the Jews' Media and *social media* censure and endlessly lie and propagandize to excuse black misbehavior.

"No evidence left on dis one!"

The only change that has occurred in 60 years is that blacks have become synonymous with violent crime, property crimes, welfare, illegitimacy, drugs and functional illiteracy. Despite the \$25 Trillion the U.S. has spent on "*Urban Welfare Spending*" since the mid-1960s, the situation has consistently regressed. Blacks today are significantly angrier, more violent, more dependent on welfare, more likely to be fatherless, more likely to be involved with drugs, and far more likely to have been incarcerated in one of our state prison systems than 60 years ago.

The vast majority of blacks have also proved themselves to be incapable of functioning and prospering in a modern society where technological complexity is beyond their capacity to adapt. Moreover, cities dominated by blacks are invariably synonymous with graft, corruption, incompetence, violence and voter fraud. Rioting, looting and nightly shoot-outs are never further away than the flash of a rival gang-sign or wearing the wrong color. Despite the predictable and resounding failings of America's societal experiment, the left has made a fetish of egalitarianism and permanently embedded it within the tapestry of American society's political, cultural, and legal traditions.

Most important of all, blacks have proved to be biologically and psychologically INCAPABLE of accepting responsibility for their own disastrous failings. Instead, they childishly and angrily lash out in an attempt to blame slavery, "White Privilege," racist police, Donald Trump, "institutionalized racism," so-called "micro-aggressions" or any of a hundred other examples of the black *excuse-de-jeur* for their endless and demonstrable shortcomings. And the situation is clearly worsening because 60 years ago they at least had the sense to pull their pants above their buttocks.

Meanwhile, immigrants from Asia and India are not white and often arrive here with little or nothing, but immediately begin to improve their situations and often succeed admirably. They usually work hard, save their money, invest intelligently and obey the law, while their second generation offspring study hard and frequently excel in school. In general, they are resented only by blacks, whose persistent failures render their endless excuses embarrassingly lame, in contrast.

In order to become a successful and contributing member of society, one must have the capacity to hold a job, and contribute to social stability by supporting one's offspring and observing the laws of your civilization. It also implies adopting the self-discipline to avoid

irresponsible behavior patterns that produce poor life choices such as violent crime, drugs and alcoholism and bastards. But nearly 160 years later -- and despite their endless coddling by our leftist "*political class*" -- becoming a contributing member of society is as alien to most blacks as Integral Calculus.
