

Critical Point

by Earl P. Holt III

'Twas mere months before *Mid-terms* and all through the land,
Americans were suffering by their own hand;
Ballots cast for Joe Biden both legal and not,
elected the worst president we ever got.

Jealous of Trump was our *political elite*,
which for decades dismissed all concerns of main street;
Aligned with the enemy to seal Trump's demise,
and take back the party it considers its *prize*.

The union rank-and-file voted as they were told,
only realizing later how much they got rolled;
Faithfully following each union-boss order,
now see the chaos and resulting disorder.

Blacks did as they always do and like they were taught,
engaging in voter fraud until they got caught;
Too doltish to realize their lot never improves,
but following blindly if Obama approves.

So-called *Independents* also got this one wrong,
since their knowledge of politics isn't real strong;
Unburdened by reading about public affairs,
unaware of real threats to their nation and heirs.

Inflation, invasion and "**green**" revolution,
have injured us so much there's but one solution;
Purging the "*Democrats*" from all public office,
before they march each of us over the abyss.
