

# A Call to Arms

by Earl P. Holt III

After the FBI raid on Donald Trump's home on August 8th, the time for wishful thinking and pretense is over: we're no longer living under *Rule of Law* in America, and it's vital to recognize this fact. Whether we admit it or not, lawful Americans are under siege by a corrupt and traitorous government and have become enemies of the state.

Through massive and illegal vote fraud, our national government has become wrongly and illegally occupied by an alliance of **communists** and **organized crime figures**. It has debauched our currency, swamped our nation with illegal foreign nationals, enriched our mortal enemies like China and Russia, and subverted our criminal justice system.

This alliance has intentionally contrived shortages of energy and food, it has armed the world's worst terrorists in Afghanistan, it has funded an *engineered* virus that killed over a million Americans, and it has routinely persecuted and falsely arrested innocent members of its political opposition. Meanwhile, the most traitorous and corrupt individuals ever to serve in public office have escaped any consequences for their criminality because they are members in good standing of this cabal.

These imposters have made our largest cities uninhabitable with skyrocketing violent crime and lax prosecution, aggressively promoted queers and transvestites as normal, and indoctrinated public school students with *Critical Race Theory* and "*groomed*" them for sexual predators with "*gender counseling*." The FBI was even enlisted to harass and threaten parents when they complained to their county school boards about their curriculum.

**There is no bargaining with these people, and there's no possibility of a return to any semblance of bipartisanship:** their lust for power and control knows no limits, so they will never acknowledge the treason and evil they've committed. In short, there's no alternative but to remove them from office -- root and branch -- and prosecute them to the fullest extent of the law. For many, this **SHOULD** include the capital crime of Treason.

It may be necessary for a new Congress to change the ***Federal Rules of Procedure*** involving *Venue*, because none of these crooks and traitors will ever be convicted in the cesspool of Washington, DC where they thrive. Mentally and morally deficient blacks and other "*swamp creatures*" are not capable of rendering an impartial or intelligent verdict. They've demonstrated this far too often, most recently in the Sussman trial brought by Special Counsel John Durham.

**If this unholy alliance is successful in stealing either the 2022 Congressional Election or the 2024 National Election, every decent American should consider it a license to engage in any form of resistance imaginable. Withholding federal income taxes would be a start.**
