

Late December Black Murder Roundup

Eliza Fletcher: This 34 year-old white teacher was savagely murdered by a vicious n*gger animal in Memphis in September of 2022. She was abducted, raped, strangled and discarded in a pile of trash behind one of the tens-of-thousands of abandoned houses destroyed by two-legged rats in the ghetto of Memphis. Naturally, her murderer was a career predator who received early parole from a prior sentence for another abduction he perpetrated. Eliza Fletcher was a loving wife and mother. **The Klan would understand how to properly deal with her murderer.**

Savage Ape & Innocent Mother

Dr. Clark Kelly: This 88 year-old white man and Veterinarian was murdered by a rabid ape in San Diego in June of 2022 at his veterinary clinic. Police suspect the nigra was burglarizing the clinic when he was discovered by Dr. Kelly, who was then murdered with a blow to the head. Fortunately, the baboon was detained by a heroic private citizen when he attempted to flee like the cowardly, sub-human species he is.

Dr. Kelly devoted his life to saving animals and was described as a "saint" by many who knew him. On the other hand, the nigra isn't worth the length of cheap rope it would take to hang his black ass.

Rabid Ape & Veterinarian

Allison Rice: This 21 year-old white **LSU** Senior was randomly shot to death in September of 2022 by one or more n*ggers while driving home after a late night out in Baton Rouge. She was found seated in her car at a railroad crossing. Her killer or killers are still at large, but police believe her murder may have been a "*gang initiation murder.*" By way of explanation, the best anyone can offer is the lame *cliché`* that "***she was in the wrong place at the wrong time.***"

The Late Allison Rice

Aimee Willard: This 22 year-old white woman and college athlete was murdered near Philadelphia in June of 1996 by a serial killer and career rapist of the species *Africanus criminalis*. He bumped her car with his own to compel her to pull off the highway, and then struck her in the head and abducted her. Afterwards, he raped and killed her and drove his car over her, leaving diamond-shaped burn patterns on her back that were eventually traced to the oil pan in his own vehicle. (*Forensic Files*, Season 5, Episode 8: "Telltale Tracks.")

Serial Killer & Soulless Ape

Leslie "Bella" Griffin: This pitiful, 31 year-old white crack-whore was murdered by a sociopathic member of the species *Homo habilis* in Tulsa in November of 2014. She was executed with a bullet to the head when her thuggish black drug supplier grew angry over her drug debt and her repeated failure to repay him for drugs given to her on consignment. (*First 48*, Season 17, Episode 5: "Secrets and Lies.")

Eli Hickerson: This 30 year-old, white male was murdered by a black baboon in a road-rage incident in July of 2022 in Indianapolis. The rat-

monkey reacted as they usually do with primitive and savage levels of violence, despite being in the wrong by driving very erratically. The victim was a passenger and innocent bystander in the other vehicle when it was fired upon by the rat-ape, who had a violent record and was also a felon in possession of a firearm. He was also on probation and wore a GPS monitoring device at the time of the murder.

Ginger Hayes: This 23 year-old white mother was abducted in her own car, then robbed and murdered by a savage nigroid beast in late June of 2001 in Greenville, North Carolina. She was changing her baby's diaper in a grocery store parking lot when she was abducted in her own car. She was first driven to an ATM where she was robbed, and then to Rocky Mount, North Carolina where she was raped and beaten to death with a tire rim. After murdering her, *Homo habilis* left her and her baby in a farmer's field, where they were discovered several hours later. The child was badly sunburned, but survived. (***Forensic Files***, Season 13, Episode 12: "Kidnapped.")

Jacob Hills: This extremely foolish 18 year-old white male was murdered in Detroit by a predatory black savage in July of 2022. The victim attended a party in Detroit and brought along his new AR-15 rifle to show off to party-goers. A 23 year-old member of the species *Africanus criminalis* immediately began licking his chops at the prospect of murdering the victim and stealing his weapon and his car, which he of course did later that night.

The teachers and parents who lied to this foolish kid -- by telling him that blacks are the same as humans except for skin color -- should be indicted as accomplices with first degree murder charges and stand trial with this black bastard who murdered this naive and foolish kid.

Martha Agnew: This staggeringly foolish 49 year-old white woman was murdered by her black baboon husband in Ypsilanti, Michigan in

February of 2018. She was strangled to death, but the baboon "*staged*" her murder to appear as if it were an overdose by injecting her with drugs. The victim was in the process of divorcing this street-ape, and he feared he would lose their house to her in a divorce settlement, so he "*settled out of court.*"

Even more bizarre, 25 years earlier, this same rat-monkey probably murdered his white girlfriend named Tammy Niver. The earlier victim was a friend of Martha Agnew, but Martha Agnew married the black bastard, anyway. It's been speculated that Marth Agnew's nig husband feared their divorce would free his wife to testify against him in the earlier murder of Tammy Niver, so he murdered her to prevent her testimony.

Brenda Bergeron Dupont: This 29 year-old white woman was murdered in her own home in Opelousas, Louisiana by a savage black ape in March of 1988. It took 28 years and the science of DNA profiling to eventually convict the baboon who murdered her. Her killer was convicted of first degree murder and given a life sentence at hard labor for raping her and stabbing her 31 times. (***Cold Case Files***, Season 3, Episode 1: "*Killer in the Storm.*")

The Late Brenda Dupont
