

Nigs ❤️ Free Money

California is what America will look like in 10 years if we allow it. *The Land of Fruits & Nuts* is governed by the biggest fools and the most incompetent people to govern since "Mad King" Ludwig II of Bavaria. Its *General Assembly* resembles the bar scene from *Star Wars*, and its elected officials in Sacramento spend like nigras with a stolen credit card.

California is hell-bent on handing free money to blacks who were never slaves, funded primarily by white people who never owned slaves. A *California Reparations Task Force* was appointed in 2020 by its reptilian Governor, Gavin Newsome, who endorsed this insane idea. Apparently, no one on the Task Force has enough brains to multiply 2.2 million black beneficiaries by the \$360,000 amount proposed per nigra, a total of \$792 Billion or about **22 percent of California's entire gross output** last year.

One particularly stupid nigra claimed at a California Reparations Task Force hearing that "There's only one thing that will stop our children from busting into these liquor stores. There's only one thing that will stop our children from bursting into jewelry stores. Reparations."

If that sounds like extortion, that's probably because it is. A similar threat was voiced by nigs back in the late-1960s, when race-hustlers convinced cowardly politicians of both political parties to pour trillions of dollars into black "*urban welfare programs*." Their rationale was to discourage further nigra riots and arson, and rebuild areas previously destroyed by nigra riots and arson. How's that working out for ya?

Unlike nigras and their enablers the world over, California's imbecilic politicians have never learned that you can't pay people -- especially nigras -- not to commit crimes. It just doesn't work because for blacks,

crime is instinctual and deep in their DNA. It didn't work then and it won't work now.

In addition to undeserving blacks who will receive a windfall, the real beneficiaries of reparations for blacks will be **illegal arms dealers, liquor store owners, the Mexican drug cartels, extremely high-end auto dealers and expensive jewelry stores**. Every spook in California is going to do what they always do when they get "*n*gger-rich*": they'll squander their newfound wealth on expensive "*bling*" to show off to all the other doltish nigras.

Of course, in a couple of years they'll no longer be able to afford repairs or insurance on their ***Benzes, Jaguars and Porsches***, so they'll end up exactly where they are now. Hopefully, that will be California's problem and not spill over and become the problem of saner taxpayers living in "*fly-over country*."

No doubt after they've squandered their reparations windfall, their next lament will be that "*systemic white racism*" prevented them from learning about investing in assets that ***appreciate*** rather than ***depreciate***.

The only good that might come of this would be if blacks were to abandon **RED STATES** and flock by the millions to California in order to receive their free, white-man money...
