

You Can't Be Serious !

After Charlottesville and the January 6th protests, you wouldn't think it was necessary to tell conservatives **NOT** to participate in street demonstrations, even to protest Donald Trump's pending indictment by an incompetent and corrupt n*gger DA in Manhattan. The left has seemingly endless *Myrmidons* to hijack and disrupt any peaceful demonstration by Trump supporters or other conservatives to make us appear violent.

Unlike the brain-dead and collectivist zombies on the left, most conservatives are demonstrably more independent-minded, maybe sometimes too much so. Most see themselves as "*Chiefs*" of their own tribes, and aren't willing to settle for being merely "*braves*." This leaves us vulnerable to the machinations of our communist enemies, and make no mistake about it, the **New Communist Party of the USA** is Bolshevik in nature, and about as "*democratic*" as **Red China**.

Those 2020 "George Floyd riots" proved that the fraudulently named "Democrat" Party can mobilize thousands of Antifa and BLM agents provocateurs within only a few hours. Using funds from George Soros and other commie-Jews, it can jet rioters around the country to burn, kill and assault cops and other innocent civilians with impunity. The demonstrators at Charlottesville and the January 6th demonstrators at the Capitol walked into the two biggest political SUCKER-PUNCHES in American history.

In response to the Grand Jury that DA Alvin Bragg has assembled in Manhattan, Donald Trump suggested that his supporters take to the streets and demonstrate. A rare voice of reason came from Glenn Beaton of the **ASPEN BEAT**, who warned that "*Democrats*" and their *Myrmidons* would certainly infiltrate pro-Trump demonstrations and turn them into violent riots. This would give the Jews' Media an excuse

to denounce Trump and his supporters as violent and "*anti-democratic*," perhaps even generating consequences for the 2024 Presidential Election. Here are Glenn Beaton's exact words:

"The Dems want that violence in order to paint Trump and his supporters as violent people. They are sure to infiltrate the protests in the guise of being on Trump's side, just as the FBI apparently did on January 6 for the express purpose of inciting violence in otherwise peaceful crowds of Trump supporters. Trump, his supporters, and Republicans in general will get the blame."

He then continued: ***"My advice to Trump supporters is don't take the bait. If you stay home, Trump can and will win his case and very possibly his campaign. On the other hand, if you take to the streets, it might feel good, but the price you pay for that evening of feel-goodery will be another four years of a presidency led by the stupid, corrupt Biden crime family that is destroying America."***

Try as I might, I can't improve on Glenn Beaton's assessment of the current situation or his advice.
