

Can My State Get One ?

In late May, the *Nigro Apologists for African Criminal Perpetrators* (NAACP) issued a "travel advisory" to nigras, warning them to beware of traveling to Florida. The NAACP claims that under Governor Ron DeSantis, Florida's laws and policies are "*openly hostile toward African-Americans, people of color and LGBTQ+ individuals.*"

The advisory further alleges that those traveling to Florida should recognize that the state "*devalues and marginalizes the contributions of, and the challenges faced by African Americans and other communities of color.*" The organization's warning was undermined by the fact that **NAACP Chairman of the Board, Leon Russell, lives in the Tampa Bay area.**

Leon Russell: *Florida, my Home Sweet Home !*

The NAACP has grown increasingly infuriated by a number of DeSantis Administration policies. In January, the administration removed Florida's

advanced placement course on *African American Studies* from its public school curriculum. It has banned "WOKE" indoctrination programs, and is also in the process of banning Marxism from Florida state universities by eliminating *Critical Race Theory* and so-called "*diversity, equity and inclusion*" (DEI) programs.

Governor DeSantis characterized the NAACP's phony travel advisory as a political "*stunt*," intended to distract from his May 24th announcement as a candidate for president in 2024. Preserving the spirit of the NAACP's *Kabuki Theater* performance, the Chairman of the ***Florida Republican Party***, Christian Ziegler, volunteered his organization to pay the moving expenses of Board Chairman Leon Russell if he would move elsewhere.

Christian Ziegler: Clever & Humorous

The NAACP joined two other groups, the ***League of United Latin American Citizens*** (LULAC,) and a queer organization, ***Equality Florida*** in recommending similar travel advisories. LULAC is enraged that Florida law prohibits local governments from funding organizations that issue

fraudulent I.D. cards to illegal aliens, while the law also invalidates the *out-of-state* Driver's Licenses of illegals. In addition, the law requires Florida hospitals receiving *Medicaid* reimbursements to ascertain if those seeking treatment are legal citizens.

Meanwhile, the queer, pervert and circus freak lobby belonging to ***Equality Florida*** are angry that the state has cracked down on the indoctrination of grade school kids with homosexuality, transgenderism and "*gender counseling*." Of particular concern was the removal from school libraries of books with graphic caricatures of kids engaged in sodomy. The queers also object to Florida's concealed-carry laws.

My only question is, what do other Red States have to do to obtain similar boycotts from race-hustling nigs, pedophiles and illegal aliens???
