

# Treason & Sabotage

by Earl P. Holt III

Michael Pillsbury is nearly unique among America's so-called "**China Experts**" because he actually speaks Mandarin Chinese. This skill has enabled him to recognize that **China's** military, intelligence and trade policies are not guided by the Confucian ideals of peaceful coexistence as we've been wrongly led to believe, they are actually guided by the 2,000 year-old principle of "**Shi**." *Shi* is a blueprint devised during China's "*Warring States Period*" to enable a weaker nation to defeat a more powerful enemy. It involves many simultaneous strategies, among which are inducing **complacency** in the enemy, slowly **encircling** an enemy, **stealing** his technology, and **deceiving** the enemy into doing your bidding. (Does any of this sound familiar?)

**Shi** also includes the strategy of manipulating your enemy's advisors in order to subtly influence their leader, indirectly. **IN THE CASE OF JOE BIDEN, CHINA HAS BYPASSED THAT TACTIC BY DIRECTLY EXTORTING AND BLACKMAILING BIDEN, HIMSELF.** The *Biden Family Crime Syndicate's* influence peddling scheme was paid tens of millions of dollars by China for doing its bidding, but Biden is now vulnerable to extortion by communist China for that very reason. It **SHOULD** be obvious that Joe Biden is not only **COMPROMISED** as a result of his dealings with Red China, he is **OWNED** by China.

When U.S. officials engage in illegal or treasonous acts with foreign governments -- as Biden has done for many years -- they may very well enrich themselves, but they also leave themselves vulnerable to extortion by those very same governments to whom they peddled influence. China's leverage over Joe Biden has been obvious for several years, but now that he is president, it has profound consequences for U.S. national security. China has been extorting endless concessions

from Biden, and as a consequence, this doltish traitor has placated his Chinese masters by weakening our national security and leaving America vulnerable to mortal enemies like communist China, itself.

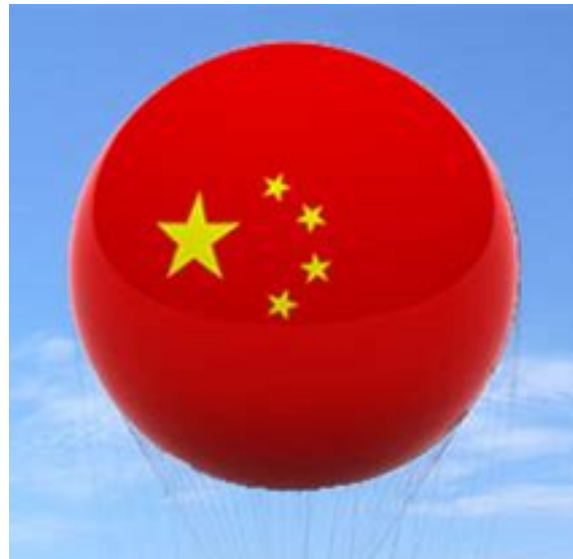

**BIDEN'S TREASON:** When the COVID scamdemic continued into January of 2021 -- as the Biden Administration took office -- Biden soon ordered all members of the U.S. military to be vaccinated with the dubious COVID vaccine. Many officers and non-commissioned officers (NCOs) refused to take the vaccine, and many were soon discharged based on their refusals. This created a *"brain-drain"* of experienced and dedicated NCOs and officers throughout our armed forces, who are the very personnel needed to arm, operate and repair the tanks, ships and planes essential to fighting a war.

Likewise, many interpret Biden's disorganized retreat from Afghanistan in 2021 as an indication of his administration's incompetence, but there may be more to that debacle than meets the eye. The U.S. abandoned the **Bagram Air Base** -- which the U.S. military spent billions of dollars improving -- but the Biden Administration can't get their excuses straight as to why. However, even if Biden doesn't see its value, China clearly does. *Bagram Air Base* has two very long and very wide reinforced concrete runways, and would provide China with one of the most valuable military assets in that region. It's hard not to conclude that Joe Biden was merely following the wishes of his Chinese masters by abandoning *Bagram* and leaving it to China.

Another clear example of treason is Biden's clandestine sales of millions of barrels of crude **oil to China** from our **Strategic Petroleum Reserve** (SPR,) which Biden has nearly emptied over the past year. Not long after Americans endured the doubling and tripling of gasoline prices caused by Biden's insane war on America's oil and gas industries, Biden began to drain the SPR to lower the price of oil and placate consumers. It is now at its lowest level since 1983. Yet, he also seized the occasion to supply his comrades in China. That's the same bunch that annually steals \$500 Billion in proprietary technologies from U.S. firms, and annually runs a \$500 Billion trade surplus against the U.S. by manipulating its currency to discourage U.S. imports. Thanks to Biden, China finally found a U.S. import on which it won't impose tariffs.

Then, in February of 2023, a **Chinese spy balloon** was permitted to traverse the entire Continental U.S., unmolested by our air defense systems. A chorus of White House liars repeatedly claimed that Joe Biden first ordered the spy balloon shot down, but was talked out of it by his quisling *Joint Chiefs of Staff*. That was a bald-faced lie, and the balloon was permitted to hover over and photograph our military installations in Montana, Wyoming, Colorado, Nebraska and Missouri

before being shot down off the coast of South Carolina, long after it had successfully completed its spy mission.

Moreover, Chinese nationals purchased over \$6 Billion worth of **U.S. real estate** in 2022, much of it located near U.S. military installations. The Chinese firms **Huawei** and **ZTE** had previously sold cell tower and router equipment (**reportedly at a loss**) to small, rural telecom providers near those recent Chinese land purchases. The combination of *state-of-the-art* **Chinese telecom equipment** -- on land adjacent to military installations -- could enable China to electronically "*jam*" or intercept strategic communications by the U.S. military. It's no coincidence that much of the Chinese-made equipment was installed near our *Minuteman III* ICBM silos in Montana, Wyoming, Colorado, and Nebraska.

The FBI's investigation into this threat prompted the FCC to issue a wise ruling in 2019 that banned small telecom companies from using certain kinds of equipment made by **Huawei** or **ZTE**. Then, in 2020, Congress

appropriated nearly \$2 Billion to remove and replace approximately 24,000 pieces of Chinese-made equipment already installed in rural areas. Yet, as of this date, **NO EQUIPMENT HAS BEEN REMOVED** because the rural telecom providers have **NOT** received funds from the Biden Administration to carry out the program. Joe Biden appears disinterested in China setting up spy installations near U.S. military bases, despite their grave risk to U.S. military communications.

Additionally, America naively engages in numerous scientific, trade, diplomatic, educational, and cultural **exchanges with China**, but most merely serve as "*cover*" for China's relentless espionage activities against the U.S. Frustrated by decades of China spying with impunity on America, in 2019 President Donald Trump created the "**China Initiative**" to engage in counter-espionage against China's legions of spies operating here. China's targets are state-of-the-art weapons systems, cutting-edge research at our prestigious universities, bribable journalists, and corrupt and witless politicians like Eric Swalwell.

Two examples of Chinese espionage conducted against the U.S. were the two spies employed by Senator Diane Feinstein (D-Senility) and Congressman Eric Swalwell (D-Beijing.) Feinstein hired one as a chauffeur for 20 years and then employed him to manage her Senate office. Swalwell was sleeping with "*Fang Fang*," an attractive Chinese espionage

agent studying in California. Both Feinstein and Swalwell were "*tipped-off*" by the FBI that they were **employing Chinese spies**, but by giving a "*heads-up*" to Feinstein and Swalwell, both Chinese spies immediately disappeared to avoid arrest and imprisonment in the U.S.

Chinese spy networks in America are staffed by seasoned professionals, assisted by 400,000 Chinese students studying here, as well as by the staff of its 100 ***Confucius Institutes*** also located here. All are required to cooperate with China's intelligence services if called upon. However, the Biden Administration **CANCELLED THE CHINA INITIATIVE** in February of 2022, with the laughable explanation that the program contributed to "*racial profiling*."

We have recently learned that Biden's folly of shipping arms to the corrupt nation of Ukraine has egregiously **depleted our stores of ammunition and weapons systems**, such as *Stinger Missiles* and *Javelin anti-tank* weapons. It's been reported that more than half of these shipments have been sold on the black market by greedy and traitorous Ukrainian military commanders, rather than used to fight the Russian invasion. Then, that senile fool masquerading as president announced this fact to the world, which had to bring comfort to our enemies in Russia and China.

The brain-dead traitor wrongly occupying the Oval Office has also made it a priority to promote queers, perverts, feminists and transgendered individuals to positions of military command. This is why every branch of the service except the Marine Corp failed to reach its recruitment goals in 2022, and recruitment goals for all branches of the services are at their lowest point since 1973. Most of the brave souls who may be asked to risk life and limb for their country will **NOT** follow into battle, anyone wearing women's panties. It's just that simple. This **woke indoctrination** of our armed forces, particularly our Navy, has left it **VERY** far from combat ready.

Like other branches, the Navy spends far more time indoctrinating recruits with the goal of "diversity," a "**green**" military, and gender reassignment opportunities. Meanwhile, 37 percent of our attack submarines are **out of commission** because they are not being repaired. Additionally, more than 10 percent (\$718 Million) of the Navy's 2023 Budget is devoted to fighting "*global warming*." Moreover, the **Government Accounting Office** found that "**steaming hours**" for Navy vessels has declined considerably, a fact that our *woke* Navy tried to hide from Congress and the public by officially classifying this fact. The GAO also reported that "***the Navy could handle a single battle damage event (but it's) uncertain how the Navy might handle multiple simultaneous or near-simultaneous events.***"

It has recently been reported that China is in the process of establishing **military installations in Cuba**, just as the Soviet Union attempted to do during the *Cuban Missile Crisis* in October of 1962. Biden's reaction was typical: at first he denied that any such installations existed in Cuba, then absurdly claimed later that China began building them during the Trump Administration, and that he had the misfortune of inheriting Trump's national security failures.

**If Joe Biden had appointed China's dictator, Xi Jinping, as America's Defense Secretary, it's difficult to imagine that Xi could have been any more effective at undermining and subverting America's national security over the past two years than "*The Big Guy*" has been. This is not a coincidence: for two and one-half years, Joe Biden has done the bidding of communist China's leaders because he is totally compromised as a result of the bribes he took from China. It's just that simple. *PERIOD!***
