

Hoist by Their Own Petard

(A *petard* is an explosive device used to breach fortifications. To be "*hoist by one's own petard*" is to be blown *sky high* by one's own device. It's often used as a metaphor for those who become victims of their own contrivance.)

Recently, I've heard kids under the age of 30 bemoan the disappearing opportunities available to them as they approach adulthood. Many are already beset by student loan debt, and face what they seem to consider a shortage of *suitable* jobs. (Ahem!) They also bemoan the staggering costs of rent, home-ownership, vehicle ownership, energy, food, and private school tuition to avoid our disastrous public schools.

Indeed, they are correct that there's a fairly grim future facing them, and it's unlikely they'll achieve the same standard of living as their parents. However, I have very little sympathy, because they have been *hoist by their own petard* after foolishly selling their souls to the most shameless liars in the universe, "*Democrat*" politicians. The latter have merely done what they've always done by promising the world and delivering disasters, instead. Elections really *DO* have consequences.

Hoist by One's Own Petard

Remember Biden's promise to **forgive student loan debt** on the campaign trail in March of 2020? Even a moron like Biden had to know that **NO** president has the Constitutional authority to forgive the debts of their supporters or anyone else. He knew that campaign promise was a lie, but he realized that a majority of those under 30 would swallow it like a trout to a fly. He got their vote, and they got the shaft.

The 20 percent increase in the cost of food is attributable to one factor, only: **Bidenomics** and the inflation that came with it. That guy and his party have been spending like n*ggers with a stolen credit card. When inflation reached 10 percent, they even had the *chutzpah* to enact a \$1.2 Trillion **Inflation Reduction Act**, supposedly to combat their own inflation. That's like using gasoline to put out an oil fire, and it proved they have no understanding of inflation's causes.

A lot of Marxist ignoramuses like AOC (D-Puerto Rico) have advocated a **guaranteed income** for everyone, and a generation of young fools enthusiastically bought into it and voted for them. That program is never going to happen, because the country is already **\$32 TRILLION in debt**, an amount 40 percent greater than our highest GDP figure for any one year. So-called "*Democrats*" would love to garner the votes of those receiving a guaranteed income, but they are already getting them. Screwed, again!

Your "**climate hysteria**" has also dramatically dimmed your futures. Since "*The Big Guy*" was fraudulently elected in 2020, the U.S. has thrown trillions of dollars at "**green energy**" boondoggles. Much like **Solyndra** and a dozen others during the Obama regime, most will go bankrupt when their federal subsidies end. That will be soon after they plunder their cash reserves and make generous campaign contributions to those who gave them "*free*" money. Those trillions-of-dollars in squandered capital won't be available to future capital streams to finance real, profit-making enterprises.

Escalating **energy** costs have made it very expensive to heat and cool your home, drive to work, or visit relatives by car. His first day on the job, that guy they helped elect president cancelled the *Keystone XL Pipeline* and prohibited leasing public lands for oil and gas exploration. The Trump Administration achieved U.S. energy independence from OPEC for the first time in 50 years, but Biden immediately ended it with his insane war on oil and gas. That's one reason why the economy is growing at about one percent per year.

Legalizing marijuana is another mostly "*Democrat*" initiative, intended to gain the votes of addle-brained *Stepford Children*. In certain states, they may now smoke this hallucinogen without fear of arrest or incarceration. They can deny the inevitable all they want, but their moments of clarity will diminish -- along with their prospects -- until they quit the habit and allow their brain to cleanse itself of THC.

"*Democrat*" politicians who legalized marijuana to win the under-30 vote didn't do them any favors. "***The New World Order***" needs an ignorant, dumbed-down and parasitic electorate, and that's exactly what legalized marijuana will guarantee them.
