

A Good Dose of Nigra

by Earl P. Holt III

A woman who appears to be Jewish and has a very Jewish-sounding name got the hell beaten out of her by a savage n*gger in Palm Coast, Florida in February of 2023. She was working as a paraprofessional at **Matanzas High School** in Palm Coast, where she committed the unpardonable sin of insisting that a 17 year-old, six-foot-six-inch and 270-pound gorilla stop playing its video game during her class.

As any self-respecting member of the species **Homo habilis** would do in a similar situation, the black bastard threw her to the floor and continued to stomp, kick and punch her in the head and back as she lay unconscious. Afterward, she needed medical attention and was taken to a hospital. The vicious assault only ended when other staff members were able to pull this subhuman and rabid black gorilla away from its victim. The savage ape then threatened to kill her as it was being arrested by law enforcement and led off to jail.

The Aggravated Battery

Normally, the victim in a situation like this would virtue signal to other Jews and the Jews Media by forgiving her assailant and requesting leniency from prosecutorial and judicial authorities. Such violent black sociopaths are normally held to staggeringly low legal standards of conduct because they are alleged to be members of a "*disadvantaged minority*." His lawyer will surely argue that it should be dealt with as a juvenile because it allegedly suffers from autism.

THE COURAGEOUS VICTIM IN THIS CASE ADAMANTLY REFUSES TO ASSIST IN MITIGATING THIS BLACK BASTARD'S SENTENCE. It appears that Jewish Americans may finally be waking up to the insanity of defending, coddling and enabling a race whose behavior is as savage and under-evolved as its evolutionary predecessor, *Homo habilis*. Perhaps the *Black Liars Murder* riots and incidents similar to this one have triggered their awakening.

Savage Black Gorilla

Homo habilis

Matanzas High School "*has been besieged by violence in recent years,*" and no doubt much of it was perpetrated by this baboon. The beast has three **PRIOR** arrests for battery, and was also involved in a fight about two months ago while in jail and awaiting trial. This sociopath faces up to 30 years in the *Big-House*, a **REAL** sanction that may finally penetrate its undersized and under-evolved brain. It may also learn the stern lesson that you can't go around engaging in aggravated assaults against humans, at will.

An equally significant lesson from this sad state of affairs is that reduced or diminished punishment for violent, black teenage savages only encourages more of their savagery. In October of 2023, 11 students at *Matanzas High School* were arrested for a brawl that erupted at the school several months after the above incident involving the rabid gorilla. When deputy sheriffs and staff attempted to intervene and stop it, they were shoved aside and punched by participants.

Recently, a 16 year-old female student was arrested at the same school for biting a teacher who tried to break up her fight with another female student. (It is presumed that the injured teacher received a course of rabies inoculations.)
