

Delicious Irony

A growing majority of black males between the ages of 14 and 50 are violent, savage, witless and predatory. They are intensely envious of anyone better off than themselves, which includes pretty much anyone with a job. They immediately begin to target such people, whom they view as "*marks*" and deserving only of victimhood.

This fact of life prompted ***Morgan State University*** in Baltimore -- a "***Historically Black College***" -- to build an 8,000-foot barrier around its campus to prevent Baltimore's dangerous black criminal element from entering its grounds. The incident that inspired its new wall was a *black-on-black* mass shooting in October of 2023 that left five people injured, including four students.

Following that mass shooting, ***Morgan State's*** President announced the college would invest \$22 million in security upgrades. These will include the 8,000-foot-long barrier -- enclosing 90% of the campus -- which is

designed to ***“eliminate unfettered access”*** to the school. ***Morgan State*** also intends to install more metal detectors, hire more security guards, and permit increased police patrols.

The installation of ***Morgan State’s*** new barrier won't receive anything like the publicity that recently accompanied the dismantling of what black race-hustlers and the Jews' Media have called a ***“spite wall”*** near its campus in April of 2021. ***THAT*** wall was built in the 1930s, and also designed to ***“eliminate unfettered access”*** by Baltimore's black criminal element, in this case, nearby white neighborhoods. (Go figure!)

“Spite” Wall

For 158 years following *The War of Yankee Invasion*, whites guided by experience -- rather than by a naïve egalitarian ideology -- have tried repeatedly to distance themselves from black crime, but received nothing but scorn and derision for their efforts. For example, majority-

white *Johns Hopkins University* in Baltimore was vilified simply for establishing its own police force back in 2021, in order to combat black-on-white violent crimes committed against its students on campus by Baltimore's predatory black street-apes.

Some blacks possessing ambition and goals in life may have finally awakened to the nightmare of all those psychopaths and sociopaths that "*progressives*" have cultivated within their race.

However, such rational efforts among blacks to avoid black predators will get a free pass from the usual suspects in the Jews' Media, who see racism ONLY where whites engage in similar efforts at self-preservation.
