

They *NEVER* Let You Down

Baltimore's former county prosecutor, a niggess named Marilyn Mosby, was recently convicted of two counts of perjury by a federal jury following only one day of deliberation. She faces a second trial in coming months for mortgage fraud, after which she will be sentenced on the basis of the first or both trials.

Mosby served two controversial terms as Baltimore state's attorney, but was defeated last November in her reelection, and left office in January of 2023. The court divided her perjury and mortgage fraud charges into two separate trials, and changed their venue to Greenbelt, MD, when she alleged she couldn't get a fair trial in Baltimore owing to the bad publicity her case created.

Mosby falsified her tax returns, claiming that her travel agency, *Mahogany Elite*, experienced losses from COVID even though it had no income and no clients. This permitted her to withdraw significant amounts from her retirement account without tax or interest penalties, which she then used to purchase Florida vacation homes.

One federal prosecutor reminded the jury, "***When the world was suffering the effects of COVID, Ms. Mosby took advantage of the situation.***" Of course, Mosby was merely following the advice of former Obama bagman and Jewish sleaze-ball, Rahm Emanuel, a proponent of the principle (paraphrase) "***never let a crisis go unexploited.***"

This illustrates two important points: First, that even a black district attorney is very likely to be crooked, because 95% of all blacks are; And second, that n*ggers will always misuse their credentials to illegally enrich themselves. I ought to know...
