

Just Speculating...

by Earl P. Holt III

Historians sometimes engage in an exercise they call a "***counter-factual hypothesis***," which is a fanciful way of imagining how the world would differ if history had taken a different course. A good example is one many of us have considered: that is, what would the world be like if Donald Trump had been re-elected in 2020, and that election wasn't stolen by the ***New Communist Party of the USA*** (NCPUSA,) an organized criminal enterprise mistakenly called "*Democrats*" by idiots and those incapable of recognizing irony.

JUSTICE: It's doubtful that Trump would have retained such a disloyal and cowardly Attorney General as Bill Barr, so his AG would probably have been someone with both brains and courage, a man such as Joe diGenova or Matt Whittaker. There would be no "*dual*" system of justice granting immunity to criminals and communists, and such a malignancy would never have evolved nor been allowed to metastasize.

As a result, the entire Biden Family would now be imprisoned for their myriad felonies, and *The Great Imposter* might actually be facing execution for multiple counts of treason. Chris Wray would have been shown the exit at the FBI, and been under investigation for perjury. Dr. Anthony "**I AM the science**" Fauci would be serving a well-deserved sentence for one million counts of manslaughter, after giving Americans COVID through his illegal funding of China's *Wuhan Institute of Virology*.

ECONOMY: If Trump had been re-elected, inflation would have remained around 1.5 percent, just as it had been for the duration of his first term. GDP would also have continued to grow at the rate of about four percent, where it had been until the *ChinaVirus* ravaged America. Our National Debt would **NOT** be at its current level of \$34 TRILLION, and Trump's contribution would have been a small increase from funds unwisely thrown at big pharma for the useless vaccine urged on him by Dr. Fauci. Biden's treasonous war on oil and gas would **NEVER** have occurred, a policy that was really a pretense for the NCPUSA to squander **TRILLION\$ OF DOLLAR\$** in subsidies to the manufacturers of "**green energy**" equipment and electric vehicles. None of those industries could survive for a milli-second without trillions in federal subsidies.

NATIONAL SECURITY: Donald Trump successfully closed our southern border by requiring prospective immigrants to "***Remain in Mexico,***" and by building 500 miles of **border wall** in strategic locations with high-traffic border-crossings. Those policies were discarded the first day the Biden Administration took office, because the NCPUSA ***WANTS*** mass immigration, whether legal or otherwise. They got their wish: after just three years, the Biden Administration has allowed 10 million illegal immigrants to cross the border and disappear into the interior of the U.S.

Among those 10,000,000 illegals are many immigrants from China, Iran, Cuba, Russia, Venezuela and other hostile nations, each of whom pose a terrorist threat to real Americans. Their presence is a challenge to the FBI's already overwhelmed and compromised counter-intelligence unit, subverted by the Clinton, Obama and Biden Administrations.

"Everything Free in America!"

Since September 11th of 2001, America's national security has never been more compromised by incompetence, treason, and subversion, nor has America been less respected by other nations. From the day Hamas invaded Israel and murdered 1,400 Israeli civilians, Iran's surrogates have fired on U.S. military installations more than 140 times with little U.S. retaliation. Also, Iran's *Houthi Rebel* surrogates are currently harassing shipping in the Red Sea, where they have repeatedly fired upon U.S. ships and the commercial shipping of other nations.

When Trump was president, Iran would not have dared to attack the U.S. or our allies. In fact, it was Trump who de-funded Iran's terrorist activities and those of their surrogates by freezing over \$100 Billion in Iranian oil revenues through the "*Swift System*" of international currency exchanges. Biden opened that valve, allowing hundreds of billions of petro-dollars to flow to Iran ever since. Moreover, Iran's surrogates are now using the \$80 Billion worth of arms that Biden treasonously abandoned in Afghanistan in his dishonorable retreat from that nation.

Iran Surrogates with U.S. Arms Abandoned in Afghanistan

Likewise, communist China would not be harassing our war ships and fighter jets in the South China Sea, or aggressively engaging in saber-rattling over their planned invasion of Taiwan. Nor would Russia have dared to invade Ukraine. It was Biden's insane war on oil and gas that made the world's market price for oil skyrocket, an event that generated windfalls for the world's largest oil producers including Russia and Iran.

It was this windfall from its oil revenues that allowed Russia to fund its invasion of Ukraine, and Iran to continue as the world's largest sponsor of international terrorism. America had earlier achieved energy independence for the first time in 50 years under Donald Trump, an accomplishment that the Biden Administration managed to squander almost immediately by shutting down oil pipelines, outlawing "*fracking*" on public lands, and halting the leasing of public lands for oil exploration.

FREEDOM: The freedoms we used to take for granted -- maybe too much so -- would never have been compromised or undermined while Donald Trump was president. The mindless "*lockdowns*" of schools, churches, businesses and restaurants during the *ChinaVirus* would **NEVER** have been permitted, so the economy would have continued to grow and kids would have continued to learn. Fauci would have been fired early-on, so "*herd immunity*" would have been permitted to work its magic, and *HClQ* and *Ivermectin* would have been allowed to successfully treat COVID.

Finally, there would have been NO special, privileged status for blacks, queers, lesbians, perverts or *trannies*, whether in the private sector or in government and our armed services. Also, there would be no DEI or *Critical Race Theory* to undermine the readiness of our armed forces, so **NO** American combat soldier would ever have to worry about being sent into battle by queers, transvestites, lesbians, or communists. Recruiting would not be at its current, dangerously low level, **because recruits would know for a fact that their Commander-in-Chief -- President Donald J. Trump -- "*had their six*" every step of the way!**
