

Candor About Race

by Earl P. Holt III

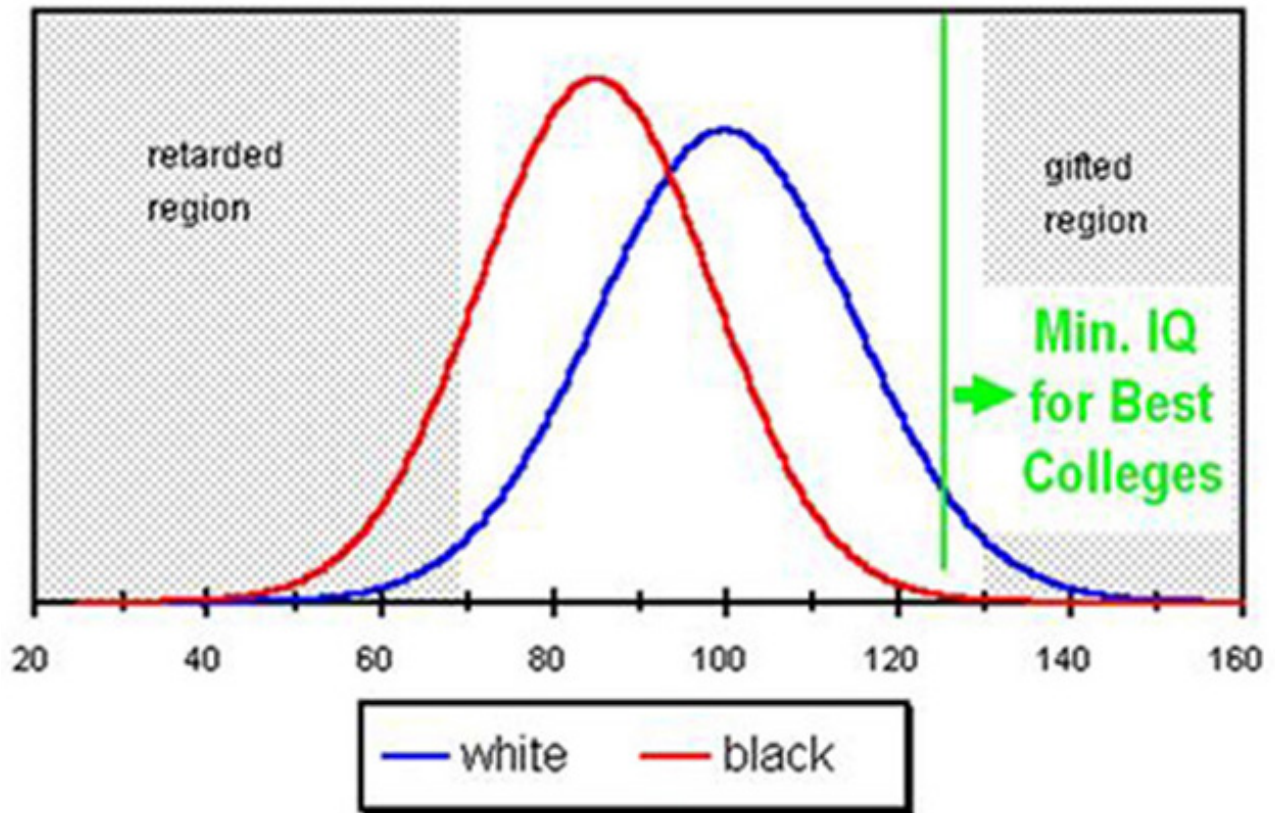

During the *George Floyd Riots* of 2020, there was a lot of braying by "Democrat" office-holders and fake news media talking heads suggesting that law-abiding, white Americans should open some sort of "dialogue" with violent black criminals who were looting, burning, killing and rioting in **BLUE** cities. The latter were true "insurrectionists," who believed the chaos they were spawning would ignite the revolution they've pursued since 1917.

It's impossible to understand race relations in 21st Century America without recognizing that the average black IQ is 15 to 20 points lower than the average white IQ. This means THE AVERAGE BLACK IS MILDLY RETARDED by white standards. Thus, most blacks will NEVER see ANY issue the same way most whites see it, since few are intelligent enough to do so. Many impulsively substitute violence for rational thought.

The Bell Curve by Herrnstein and Murray is an evaluation of the 650 empirical studies that prove this disparity in average black and white IQ measurements in the U.S. It affords such overwhelmingly conclusive proof that the subject must be censored everywhere except within white nationalist circles, where telling the truth is not only permitted, it is actually demanded. The relationship between race and IQ has become a subject that dare not speak its name.

Blacks, themselves, have traditionally and tacitly acknowledged this IQ disparity. In the early 20th Century, their leadership often made reference to "**the talented ten percent,**" by which they meant the top 10 percent of America's black population in terms of intelligence. Of course, the top ten percent of black IQs puts them at about the same IQ level as the **AVERAGE** white IQ, or around 100 on a standardized IQ test.

black and white IQ distributions

Intelligence disparities are immediately apparent when the subject of law enforcement is considered. Blacks complain endlessly about the nature of their interactions with police: they complain about so-called ***“racial profiling,”*** they complain about ***“driving while black,”*** and they complain about the disproportionately high percentage of ***black inmates*** populating our state prisons and county jails. (***“I ain't gonna send no mo' black mens to prison.”***)

Few blacks have the intelligence or judgment to recognize that all these complaints arise from the fact that blacks are nearly synonymous with crime, and violent crime in particular. This causes blacks to have far

more interactions with police than other races. If most blacks weren't so heavily involved in the criminal sub-culture they've created, they would experience far fewer interactions with police. Few Asians have these problems, and neither do most whites.

According to the FBI's *Uniform Crime Reports*, despite being only 13 percent of the U.S. population, blacks consistently commit a majority of property crimes in the U.S. each year. They are also synonymous with most **VIOLENT** crimes, a category that consists of rape, robbery, murder and aggravated assault. In fact, blacks may well commit 90% (or more!) of all murders in the U.S. each year.

That's because the category *Race of Offender* cannot be identified in more than one-third of all murders each year, and the vast majority of these incidents probably consist of blacks gunning each other down in the middle of the night in our increasingly violent, large, urban areas like Chicago, Washington, Atlanta, Philadelphia, Detroit, New Orleans, St. Louis, etc., etc., etc. The vast majority of these murders are committed by young blacks, who rarely receive "*recognition*," since there are few if any witnesses, or at least witnesses willing to cooperate with police.

Here's another fact that illustrates the true nature of race relations in the U.S., but one that is carefully "filtered" by the fake news industry: in stark contrast to the narrative endlessly promoted by fake news, blacks are 50 times more likely to commit an inter-racial violent crime against a white than the reverse.

The most recent data I have is from 2018, courtesy of the *Bureau of Justice Statistics*. That year there were 593,598 interracial violent crimes committed between blacks and whites in America, of which blacks committed a total of 537,204 violent crimes against whites, or 90% of them. Meanwhile, whites committed a total of 56,394 violent crimes against blacks, or 10%. (Data excludes murder.)

Since America's white population is currently about five times the size of its black population -- but commits only about one-tenth the number of inter-racial violent crimes against blacks that blacks commit against whites -- it can be stated that **blacks are 50 times more likely to commit an interracial violent crime against whites than the reverse.** (That's 10 times as many offenses committed by a minority that's one-fifth the total of the white population, or $10 \times 5 = 50$.)

These statistics represent the TRUE nature of race relations in the U.S. Blacks know better than to acknowledge this truth, because they have successfully waged an undeclared race war against whites since the mid-1960s. It is estimated that blacks have murdered approximately 200,000 whites since then, but the only crimes that are ever publicized by the fake news media are the relatively rare instances of white-on-black violent crimes.

Because of the enormous disparity between black and white interracial violent crime rates, it has become increasingly necessary for the fake news industry to intentionally obscure the race of violent black offenders in their news stories. Even where the race of a perpetrator might be of some value in identifying a suspect *at large*, the perpetrator's race is scrupulously censored or "spiked."

That's because at its national convention in Indianapolis in 2009, the fraudulently named "***Society of Professional Journalists***" reached the collective decision that their profession had not gone far enough in obscuring such vital information, so it adopted a **FORMAL POLICY** to censor the race of violent criminal suspects except in "*extraordinary*" situations.

The motives of the Fake News Media are not difficult to ascertain, however, whether they remain in the form of an unspoken conspiracy,

or they are formally acknowledged, as the mis-named *Society of Professional Journalists* has obligingly done.

For more than 60 years, whites have been indoctrinated with the patent falsehood that *“we are all the same except for skin color,”* or that *“race is an artificial construct.”* This narrative has been aggressively promoted by Cultural Marxists -- particularly the entertainment industry, the fake news media, the *“Democrat”* Party, and the public schools -- and their efforts have ushered in many calamitous and destructive policies, such as the forced integration of schools, workplaces, and residential neighborhoods.

Buy guns, buy ammo, learn how to use them proficiently, and get as far from our large, urban areas as income, savings and geography permit. These areas will not get better, they will only regress due to the incredibly low caliber of their black leadership. **DO NOT** allow yourself or your loved ones to become victims of a violent, savage, witless and predatory race, most of whose members aren't worth the powder in one rifle round.
