

# Fruits with Nuts

by Sidney Secular & Earl Holt III

The malignancies of the queer movement have metastasized into far too many areas of life in the West. Various *gender-fluid* delineations are constantly foisted upon us, which we're expected to condone. These include perverts termed *non-binary*, *queer*, *bisexual*, *homosexual*, *pansexual*, and others bearing the prefix "**trans.**" Their movement has many promoters and no shortage of those who benefit financially.

Federally-funded public school "**gender counselors**" enthusiastically promote and encourage gender "*transitioning*," sometimes advocating the use of hormone therapies, mastectomies, and genital surgery. Many have deviously targeted children as young as grade-schoolers, and they often attempt to do so without parental notification or consent!

**Public School Gender Counselors???**

Some schools have set up "*queer contact points*," often staffed by gender counselors. Here, vulnerable children who may be experiencing the normal anxieties and insecurity of childhood can be easily convinced their problem is "*gender dysphoria*." This creates an incentive for even normal kids to complain of the symptoms of *gender dysphoria* to receive approval from authority figures.

Meanwhile, **school libraries** often provide what are essentially pornographic materials loaded with images of deviant sexual practices. Queer organizations and their lobbying groups aggressively fund these materials, and then scream censorship when parents or school administrators discover their treachery and remove those books. Thus, we are faced with a situation in which the federal government, some irresponsible educators, and queer organizations are funding and encouraging abnormality and depravity in our schools.

**Good, Wholesome Curricula???**

Through what is termed "**social contagion**," entire groups -- unduly influenced by social media -- may spontaneously conclude they are transsexual or some other variety of queer. The attention they receive may momentarily add meaning to otherwise empty and directionless lives. This allows maladjusted kids to bask in the glow of approval from anonymous trolls inhabiting **X**, **Facebook** and **TikTok**, who prey on those with low self-esteem. Videos of people enthusiastically showing off their "**transitioned**" bodies sometimes make the rounds on social media.

The primary reason the transsexual movement has insinuated itself so successfully into society is that gender reassignment therapies are profitable to the **pharmaceutical industry** and some in the **medical profession**. Moreover, gender transitioning surgeries are expected to grow by as much as 25% per year over the next several years. Wealthy leftists -- with more money than judgement -- often virtue-signal by funding the transgender lobby and queer organizations who promote such medical experimentation. Some even fund *chairs* for *Transgender Studies* at prestigious universities.

Big Pharma donates millions to the queer movement and its lobbyists. In turn, queers lavishly fund medical facilities that perform gender transitioning therapies, thus subverting the advice of **Hippocrates** to "**FIRST, DO NO HARM.**" Medical facilities willing to perform gender transitioning therapies have sprung up like mushrooms after a warm rain because gender transitioning is profitable. **That's why the transgender lobby relentlessly seeks to define "trans-rights" as human rights, in order to shift the exorbitant costs of gender transitioning surgery onto an unsuspecting public.**

Introducing the transsexual movement into the consciousness of children is done in a variety of ways, such as films, TV shows and books that promote the queer lifestyle. **Disney** is the worst offender, and seems determined to include *Trans*-characters in every film to incrementally desensitize the public to that tawdry lifestyle and make it appear *normal* or even *glamorous*. Meanwhile, *drag queens* read stories to kids in which lonely people feel loved and understood as soon as they declare their transsexuality.

School parties, school trips, and even parents evenings are sometimes organized to foster the transgender culture (or *cult*) to indoctrinate potential recruits.

**Innocent *Drag-Queen* Reading Hour?**

To combat the queer lobby's disinformation efforts, guidebooks have been written to assist parents in combatting this cult-like movement. One written by Maria Keffler is called ***Desist, De-Trans, Detox: Getting Your Child Out of the Gender Cult***. In a complete inversion of reality, books such as Keffler's are denounced by the queer lobby and its enablers as "***harmful to minors.***" Their purpose is to seduce children with low esteem into believing that their lives will improve if they enter into the "*trans*" community.

Gender ideology is being forced on society by perverts and profiteers through their funding and influence. Normal and decent people don't need to be told how evil and insidious it is to cultivate *gender dysphoria* in young kids by encouraging them to pursue gender reassignment therapies. **Pederasts, Big Pharma, psychologists, and increasingly unprincipled medical professionals are the primary beneficiaries.**

**However, until this movement is banished like the money-changers from the *Temple Mount*, trans-activism will continue to mentally and physically damage millions of society's most vulnerable. It is high time to defend and protect our children, and to publicly expose the damage that perverts are inflicting on our kids.**
