

Marginal *Citizens*

by Earl P. Holt III

While decent Americans celebrated the 248th Anniversary of ***The Declaration*** and our founding as a nation on July 4th, in cesspools like Chicago, the n*ggers entertained themselves with their *own* fireworks. During the four-day weekend, they managed to kill 17 and wound 100 with gunfire. Naturally, most of the violence took place on Chicago's *southside*, and occurred late at night when only black *nightcrawlers* are about.

This year Chicago experienced a dramatic increase in violence over the previous year. In 2023, there were only 18 individuals injured by gunfire and only two killings during the 4th. Obviously, under the city's current black "*leadership*," Chicago has become increasingly violent and infinitely less governable, just like every predominately black area where whites have either fled or been killed-off.

Rabid Apes with Guns

Among this year's victims were two women, both innocent bystanders, one of whom was 74 years of age and the other 31. Each was shot in a leg and then treated at a nearby hospital. Someone who grew up with the 74-year-old victim was outraged by the violence. Referring to the two victims, she stated: **"They don't bother nobody. They are the sweetest ladies you will ever want to meet."** She then described the 4th of July in Chicago as **"Assassination Day."**

Chicago Mayor Brandon Johnson managed to issue a *canned* statement that must have been *ghosted* for him since every word was spelled correctly: **"We extend our heartfelt condolences to the families and communities impacted."**

Mo Niggahs

One Chicago resident who spoke to the local news media about violence in Chicago was Vaughn Bryant, Executive Director of the **Metropolitan Peace Initiatives**. His organization is an umbrella group that consists of many community-based organizations concerned with reducing gun violence. He had this to say about the July 4th bloodshed:

"When you grow up in an environment where there's trauma, you don't resolve your conflicts in an adaptive way, and you use means that can be extreme, for what ultimately, are petty conflicts that don't require people to lose their life. . .It's our city, and anything that is happening in our city as citizens, it's our responsibility. . .You can't complain that you don't have businesses. . .when we're not keeping it safe in the areas for the businesses to thrive."

(Translation: he is saying that n*ggers are inherently violent and kill each other over trivial matters, which is why ALL black areas inevitably experience "food deserts" and "retail deserts.")

What was conspicuously absent in all the complaining about black gun violence was an acknowledgement on the part of Chicago's black residents that its black leadership is largely responsible. Immediately after Chicago cut its police budget by \$80 Million in 2021, its homicide rate began skyrocketing to 834 murders -- an all-time record -- and incidents of car-jackings increased 32 percent to 1,800, another record. Cutting its police budget was to Chicago's violent black criminals what *chumming* the water is to sharks.

Syndicated RINO columnist George Will once declared that *"...we get the kind of government we deserve."* Although his aphorism is **NOT** accurate when applied to decent Americans, it's clearly true of the black imbeciles in black-dominated cities who persist in returning corrupt, incompetent, and mentally-deficient blacks to public office. Things will **NEVER** improve, and violence and murder will only get worse so long as that's the case. (See below.)
