

The *TRUE* Culprits

So-called "*Democrats*" and their comrades in the Jews' Media -- who have vilified Donald Trump for eight long years -- are now feigning dismay at his July 13th assassination attempt near Butler, Pennsylvania.

The same kikes, n*ggers, queers, feminists and communists -- who have repeatedly called him a "*Nazi*," a "*white supremacist*," and a "*threat to democracy*" -- are now trying to cover their asses by pretending they are appalled by this recent event. The truth is that they, themselves, are just as culpable as the attempted assassin for the events of July 13.

The attempted assassination of Donald Trump was very much like the assassination attempt against Ronald Reagan in March of 1981. Fearing a threat to their power and influence from a political opponent who preached smaller government and tax cuts -- and who won 43 states in his election -- the *deep state* engaged in endless vilification of *The Gipper*.

This generated an atmosphere of frenzied panic in Washington, prompting John Hinckley to crawl out from under his rock to kill President Reagan, and by doing so, become a hero to actress Jodie Foster. That's called a delusional psychosis, and Hinckley was just following what he assumed was the game plan of the "*Democrat*" Party and their comrades in the Jews' Media.

In early July, the Cadaver-in-Chief stated that "*we're going to put a bullseye on Trump*," and at least one lunatic was listening. Early reports are the would-be assassin is a 20 year-old "*registered Republican*." For some unexplainable reason, he also donated \$75 to *ActBlue*, a dangerously treasonous and corrupt Bolshevik organization that bundles dark money for "*Democrats*." He is now room temperature.

Trump's supporters understand perfectly what "*Democrats*" and the Jews' Media have done to political discourse in this country: as the injured and rattled Donald Trump was being helped off the stage and into his limo, dozens of Trump supporters wearing MAGA Hats repeatedly "*flipped-off*" cameramen from the Jews Media.

***Flipping-Off* the Jews' Media**

It's very hard not to see the *Hand of God* in this. The sniper was only about 152 yards away from Trump when he fired, a distance at which most practiced deer hunters can shoot groups the size of a half-dollar. Yet, Trump's only injury was to his ear. Like the bullet holes in Washington's cloak and the bullet fragment that missed *The Gipper's* heart by only millimeters in 1981, God also smiled on Donald Trump.
