

# Junior Varsity Rejects

by Earl P. Holt III

When the Biden Administration wrongly assumed office in January of 2021, Biden or some other liar in his administration declared that (paraphrase) **"Now, the adults are in charge."** In fact, his *State Department* and national security team more closely resemble losers who couldn't make their high school junior varsity, even as Seniors. They have been repeatedly **"played"** by our dangerous enemies, exposing both their incompetence and their disregard for America.

In October of 2023, Venezuela's dictatorial Maduro regime and its political opposition signed the *Barbados Agreement*, vowing to hold open and fair elections in 2024 that would permit independent, international observers. In return, the Biden Administration **lifted U.S. sanctions on Venezuela's oil and gas** industries that were originally imposed by the Trump Administration. At the time, the U.S. warned Maduro that sanctions would be re-imposed if he failed to abide by the *Barbados Agreement*. As usual, one of our enemies **PLAYED** these so-called **"adults"** by calling their bluff.

Following Venezuela's July 28th *National Elections*, its government-controlled **National Election Council** declared Maduro to be the victor, but most observers are dubious. Both pre-election **opinion polls** and **exit polls** showed Maduro losing dramatically and afterwards, Venezuelan protestors soon filled the streets demanding the regime's promised transparency. Transparency was not forthcoming: the *National Election Council* has failed to release Venezuela's precinct-by-precinct tallies, clear evidence it is intent upon hiding something. Venezuela's opposition candidate, Edmundo Gonzalez Urrutia, claims to have in his possession 80 percent of the tallies (called **"actas"**) and is convinced he received at least two-thirds of the vote.

**Nicolas Maduro, Mass Demonstrations & Edmundo Gonzalez Urrutia**

Venezuela is an economic basket-case thanks to the Maduro regime's embezzlement of oil revenues to enrich his graftocracy. It has endured galloping inflation, food and medicine shortages, abuses of human rights, and eight million of its citizens have fled Venezuela since Maduro seized power. Now, thanks to the incompetent, amateurish and traitorous dolts in the Biden Administration, Maduro will probably die in office and Venezuela's elections will continue to resemble those in the New Soviet Union under Vladimir Putin. Naturally, China and Russia were quick to congratulate Maduro on his "victory," since both recognize a kindred spirit when they see one.

The Biden Administration had earlier demonstrated its inherent weakness to the world with its disorderly and humiliating **retreat from Afghanistan** in 2021, abandoning \$85 Billion worth of *state-of-the-art* military equipment and hundreds of American citizens to the mercy of the Taliban. The so-called "adults" were **DECEIVED** into fashioning some kind of "**gentleman's agreement**" with Taliban leaders, who promised to *stand down* until U.S. forces had successfully vacated the Kabul Airport. Apparently, these *adults* had never heard of **Taqiyya**, the principle that grants Moslems license to lie in order to gain an advantage over an enemy. Afterward, sophisticated U.S. military equipment fell into the

hands of the Taliban, and remains an enduring memento of the Biden Administration's gullibility and incompetence.

The Biden regime consists of many of the same losers who served Barack Hussein Obama, our first nigroid, Moslem, communist and probably homosexual president. As the Biden Administration would later do in Afghanistan, the Obama Administration made the tactical error of "**outsourcing**" security to unreliable *locals* as a **gesture of good will**. Many of these were loyal to the Taliban, with no loyalty to America. In both Benghazi and Afghanistan, when Islamic terrorists began to gather prior to their assaults, this "**outsourced security**" scattered faster than cockroaches when the lights come on.

**Not Even J.V.: Anthony Blinken, Jake Sullivan & William Burns**

A key player in the Afghanistan debacle was Joe Biden's *National Security Advisor*, **Jake Sullivan**. As in most "*Democrat*" administrations, before entering government Sullivan had been an academic, where there are **ZERO** real-world consequences for pontificating fatuous and delusional abstractions. Earlier, he was Hillary Clinton's *Deputy Chief of Staff* when

she served as *Secretary of State* during this nation's earlier disaster in Benghazi, Libya. There, our U.S. Ambassador, his subordinate, and two courageous security team members were abandoned to die, with no rescue attempt ever made or even attempted. Just as Jake Sullivan and Barack Obama were architects of the disaster in Benghazi, Jake Sullivan and Joe Biden were the architects of the catastrophe in Afghanistan.

Similarly, Obama aggressively pursued his "*Iran Deal*," which financially rewarded Iran for sponsoring international terrorism over the course of many decades. It released to Iran more than \$150 Billion in Iranian assets frozen in the *Swift System* of international currency exchanges, and included a "*gratuity*" in the form of \$2 Billion in U.S. \$100 bills. In return, the Obama regime received **vague and unverifiable promises** from Iran not to pursue its nuclear weapons program. However, Iran took the money and continued *full-steam ahead*.

***Houthi* Rebels: Newly Armed by the Biden Administration**

Despite endless lies from Iran under the guise of *Taqiyya* -- and, by the way, *Taqiyya* is a *Shiite* interpretation of the *Koran* -- the Biden Administration mindlessly and stubbornly resurrected Obama's *Iran Deal* once again, unfreezing hundreds of billions in Iranian *oil revenues* in return for more dubious promises. Apparently, both administrations seem to have found the *Iran Deal* to be useful in creating the illusion of a foreign policy "*victory*" to enhance their images. Israel is now under siege by at least three of Iran's proxy terrorist groups -- *Hamas*, *Hezbollah*, and *Houthi* rebels -- with each being newly-funded by the very monies released under the *Iran Deal*. Obama and Biden's arming of Iran through the *Iran Deal* will continue to fund terrorism, generate instability, and cost innocent lives for decades to come.

Rather than their being "*adults*," the national security and foreign policy "*experts*" routinely found within "*Democrat*" administrations are not competent, nor are they honorable. They can only be described as traitorously subversive **FOOLS**.

**Real national security does not mean capitulating or acquiescing to the aggression of your mortal enemies, it means ensuring peace by enhancing your nation's defenses, so they possess a credible deterrent. Your enemies won't like you, but at least they will respect or fear you. That is hardly the case at this time.**
