

China's Strategy to Conquer America

by Earl P. Holt III

Michael Pillsbury's profoundly important book, *The 100 Year Marathon*, introduced Western audiences to the 2,000 year-old Chinese principle of "**SHI.**" It's one of several strategies gleaned from China's "Warring States" period to defeat a stronger opponent by *slowly-but-steadily* undermining and encircling that enemy, much as a python surrounds its prey before striking. It is particularly effective when used subtly and incrementally against an enemy that remains unaware of its application. It is **MOST EFFECTIVE** when that enemy assists in its own demise, as America has done for decades.

There are other strategies from China's "Warring States" period described in Pillsbury's book, and **SHI** is merely one of several. They have guided China's military, intelligence and industrial policies since

Mao Zedong, although a parade of America's so-called "*China Experts*" have consistently provided faulty advice to the contrary for decades. Unlike Pillsbury, few if any of these *experts* spoke **Mandarin Chinese**, so they remained oblivious to China's true intentions. This very phenomenon is an example of one particular *Warring-States* strategy, that of **MANIPULATING THE ENEMY'S ADVISORS SO AS TO INFLUENCE HIM INDIRECTLY**.

For the 50 years since Nixon's initial overture to China, China has subtly influenced U.S. foreign and trade policy to its benefit -- and our detriment -- by disguising its true intentions to America and the rest of the world. It has successfully cultivated the illusion of **peaceful coexistence** and goodwill in order to influence not only U.S. officials, but also those at the *World Bank*, *World Trade Organization*, *International Monetary Fund* and *World Health Organization* (WHO.) China's deception has rewarded it with enormous benefits in terms of access to Western capital markets, opportunities to engage in espionage, platforms to disseminate propaganda and disinformation, as well as new opportunities to steal industrial secrets and military technology.

Disarming *Crocodile Smile* of Xi Jinping

Here's a recent example: China clearly owns the soul of *World Health Organization* Director-General Tedros Adhanom, who is indebted to China for his position because of China's aggressive lobbying efforts on his behalf in 2017. In return, Tedros has done everything in his power to obstruct attempts by the international scientific and public health communities to investigate the ***Wuhan Institute of Virology***. Tedros was desperate to hide the *Wuhan Lab's* role in engineering the *ChinaVirus* into a more virulent and contagious pathogen, so he obediently parroted China's lies to the world about its origins and transmissibility.

A more accurate perception of China and its intentions was revealed in 1996 when Senators John Glenn (D-OH) and Fred Thompson (R-TN) held Senate hearings that exposed China's efforts to influence U.S. elections with illegal campaign contributions from China. **(B. Duffy & B. Woodward. "FBI Warned 6 on Hill About China Money." WASHINGTON POST, March 9, 1997.)**

China designated this effort "***The Plan,***" and it consisted of direct campaign contributions to sympathetic or "*friendly*" Members of Congress and other "*promising*" public officials in elective office like Bill Clinton. According to one Chinese defector, the negative publicity from these hearings prompted China to discontinue the project in 2000. Obviously, it was later revived.

Some of China's intelligence operatives in the U.S. -- such as "*Christine*" Fang -- regularly made *bundled* campaign contributions -- consisting of very *dark China money* -- to corrupt and traitorous politicians like Eric Swalwell (D-Beijing,) who served on the ***House Select Intelligence Committee*** until he was removed after Republicans achieved a majority in January of 2021. Swalwell is a loud-mouthed traitor, and one of the most treasonous, corrupt and clueless Marxists in the entire U.S. House of Representatives. NO state secret of the United States was safe with this douchebag on the *House Intelligence Committee*.

"Honey-Trap": Swalwell and "Christine" Fang

China also hit the jackpot when intelligence officials discovered to their amazement that the son of a U.S. Vice President was shamelessly and aggressively **pursuing foreign bribes**, and that -- in Hunter Biden's own words -- the proceeds of those Chinese bribes were split with his father, **"The Big Guy."** Hunter Biden's e-mails from his infamous laptop computer even indicate they were fully aware that the **Biden Family Crime Syndicate** was colluding with **China's intelligence services**. In their wildest dreams, Chinese intelligence officials never anticipated this strategy could work so successfully.

Another *Warring States* strategy is to **INDUCE COMPLACENCY IN THE ENEMY TO AVOID ALERTING IT BEFORE IT IS TIME TO STRIKE**. China has employed this strategy in several ways. Much *Chinese Communist Party* propaganda is disseminated by the hundreds of **Confucius Institutes** found worldwide. Approximately 100 were located on U.S. college campuses until the espionage activities of some were exposed during the Trump Administration, after which several were expelled. Their purpose is to cultivate the image of a kindly and harmonious China by emphasizing Confucian virtues such as **pacifism** and **sincerity**. In reality, they are under the heavy-handed control of China's *Politburo*.

Confucius Institutes on American Campuses

Encouraging complacency among its American enemy is also evident in China refraining from trumpeting its own successes. Beginning from almost nothing, in less than two decades China became the world's largest producer of paper, steel, fertilizer, cement and auto parts. Yet, you won't hear China brag about those successes because it wishes to remain *under-the-radar*, so as not to alert Western nations like America to the realization that they have exported staggering amounts of their own manufacturing base to China.

In 1983, the President of the **World Bank**, A. W. Clausen, met with Deng Xiaoping in Beijing and entered into a **secret agreement** in which a team of **World Bank** economists were allowed to study China's economy. Its purpose was to make recommendations that would enable China's economy to surpass the U.S. -- its economic rival -- in 20 years. The *World Bank* team made several common-sense proposals such as converting industries to export more sophisticated and manufactured *High-Tec* goods, as well as advice to encourage foreign investment and minimize its foreign debt. (***World Bank Economic Report: "China -- Long-Term Development Issues and Options." October 31, 1985.***) The point here is that this program **REMAINED SECRET** for years to avoid alerting America or other Western nations to China's true ambitions.

Another strategy currently guiding China involves **STEALING THE ENEMY'S IDEAS AND TECHNOLOGY**, which is much more cost-effective for China than developing them, itself. This approach has been described many times in the **INFORMER**, and it is most evident in the annual \$500 Billion worth of new technologies, trade secrets and patented processes ruthlessly stolen from U.S. firms each year as the price they pay for doing business there. China's state-owned enterprises then "**counterfeit**" or "**pirate**" U.S. products, and turn around and compete directly in world markets against the very firms that pioneered them. Some experts believe China's theft of technology may account for as much as 20% of its annual *gross domestic product*.

Even more disconcerting, China's technology theft includes a great many critical U.S. weapons systems. A classified study by the Defense Science Board indicated that China had accessed and stolen the blueprints to as many as 24 highly-sophisticated American weapons systems, including the Patriot Missile, The Aegis Missile, the F/A 18 Fighter, the V-22 Osprey combat aircraft, and the Littoral Combat Ship. (Ellen Nakashima. "Confidential Report Lists U.S. Weapons System Designs Compromised by Chinese Cyberspies." WASHINGTON POST, May 27, 2013.)

China's J-20 Stealth Fighter

The funding and activities of the **Wuhan Institute of Virology** offer a nearly perfect illustration of a fourth strategy, **DECEIVE YOUR ENEMY INTO DOING YOUR BIDDING WHILE WAITING FOR THE OPTIMAL MOMENT TO STRIKE**. America's **National Institutes of Health** (NIH) and **The Pentagon** contributed millions of dollars to **EcoHealth Alliance** of New York over the course of several years, supposedly to combat biological weapons research. In reality, **EcoHealth** conveyed funds to the **Wuhan Institute of Virology** that created the COVID-19 virus. There, China's military secretly coopted its mission and engaged in **virological warfare research** funded by U.S. taxpayers. This betrayal ranks up there with the Jewish communists who conspired to give Stalin our blueprints and enriched Uranium for the atomic bomb.

Another example of China allowing others to do its bidding involved the role of the greedy and foolish U.S. investment banking community, which aggressively lobbied the Senate to permit China to join the **World Trade Organization** (WTO.) The fools at **Goldman-Sachs** and **Morgan-Stanley** were joined by a *Halleluiah Chorus* of charlatans in the Jews' Media like Thomas Friedman at the **NEW YORK TIMES**, who is consistently wrong about nearly every subject on which he has pontificated. Most of them remained willfully blind to China's true aspirations, and persisted in viewing China as a "*backwater*" economy, with potential to be an "*emerging democracy*" and a reliable, future "*capitalist*" trading partner.

Its membership in the WTO allowed China to borrow Western capital from the World Bank and International Monetary Fund for three decades -- courtesy of its ideological enemies in the West -- and then continue to pursue its goals of overtaking and dominating Western democracies, both economically and militarily. Rather than emerge as a reliable trading partner engaged in reciprocal trade, China has become an international pariah through ruthless trade surpluses, heavy tariffs on imports, the subsidizing of state-owned enterprises, the theft of rival technologies, and currency manipulations.

Another strategy from the Warring States period is to **AVOID BECOMING ENCIRCLED BY THE ENEMY**. China has improved on this strategy by carrying it one step further with its "*Belt and Road*" initiative, which aggressively "*encircles*" Western democracies. The best example is China's growing and menacing presence in the *Panama Canal Zone*, through which passes two-thirds of all U.S. imports and exports. China is also aggressively pursuing infrastructure projects in Africa and South America in order to gain a foothold from which it can interrupt the flow of scarce minerals and elements essential to Western industry and Western military applications.

A final strategy of *SHI* -- and easily its most effective against America -- is to **MANIPULATE THE ENEMY'S ADVISORS, SO AS TO INFLUENCE ITS LEADERSHIP INDIRECTLY**. When U.S. officials accept bribes from foreign governments -- as the *Biden Family Crime Syndicate* has done for many years -- they may enrich themselves, but they also become vulnerable to extortion by those same governments. In the case of Joe Biden, China has successfully bypassed the need to manipulate America's advisors by directly blackmailing and extorting the President of the United States, himself. It **SHOULD** be obvious that Joe Biden is not only "*compromised*" by his dealings with communist China, he is **OWNED** by China.

The year 2049 is the 100th Anniversary of the establishment of communist China's "**road to renewal**" plan, begun under Mao Zedong in 1949. It provides the title for Michael Pillsbury's book because it precisely expresses China's goal to "**reclaim its rightful place atop the global hierarchy.**" (Pillsbury's words.) China's secret goal is to surpass America and exert its economic and military domination around the globe, an aspiration that has not wavered in 75 years. It's been extremely successful in these ambitions because our "**leaders**" have aided and abetted it every inch of the way.

With the exception of Donald Trump and his administration, this self-delusion among American officials is reminiscent of the naivete and gullibility of Afghanistan's central government in 1979, when it supposedly "invited**" the Soviet Army into Afghanistan under the auspices of the **Soviet -- Afghan Friendship Treaty of 1978**. We all know how that worked out for the Afghanis...**
