

# Perverse Priorities

by Earl P. Holt III

"Democrats" and their Marxist comrades took a shellacking on November 5th because they've been tone-deaf for more than 50 years. Most reside in echo-chambers such as Hollywood, Martha's Vineyard, San Francisco, DC, or Manhattan, so they have no idea how perverse and twisted their political and ideological agendas have become. They remind me of **NEW YORKER** film critic Pauline Kael, who whined after Nixon won 49 states in 1972: *"Everyone I know voted for McGovern."*

For reasons that defy logic, "Democrats" and their comrades on the left persist in viewing **CRIMINALS** as victims, and **COPS** as the bad guys. Perhaps it's because those who call the shots in their party -- their elected officials and large donors -- enjoy the luxury of security details and gated communities, so they never experience n\*gger street crime. That may explain why many **BLUE** cities mindlessly defunded the police and initiated phony "justice reforms." In many locales they waive cash bail, offer early parole for violent felons, and have de-criminalized serious offenses. As a result, most of these cities set all-time records for violent crimes and property crimes immediately after "justice reform."

*"Victims"*

*"Bad Guys"*

Some of the most **restrictive gun laws** in America are also found in **BLUE** states such as California and Illinois, and in cities like Los Angeles, San Francisco, Chicago, New York and Washington, DC. After effectively disarming their own residents, when COVID appeared, many of these cities and states didn't hesitate to release many violent and dangerous criminals under the pretense of "*justice reform.*" This exposed their greater concern for the well being of **VIOLENT FELONS** than for **LAW-ABIDING CITIZENS**, who were often harmed and sometimes murdered by the dangerous criminals released by their own elected officials.

The left has also demonstrated a much greater sympathy for **ILLEGAL ALIENS** than for legitimate **AMERICAN CITIZENS**. Open borders have welcomed not only the trash of the Third World, but also tens-of-thousands of murderers and rapists who are now free to roam the land. The Fentanyl that drug cartels traffic here in the U.S. has killed 160,000 Americans, thus far. Many other innocents have been raped and murdered or carved-up with machetes by psychopathic gang members.

**MS 13 "Newcomers"**

Demonstrating all the loyalty of a Bernie Madoff, "*Democrats*" and their comrades have aided and abetted **TERRORIST NATIONS** such as Iran and its proxies, while coolly abandoning America's **TRADITIONAL ALLIES** like Israel. The left now enthusiastically supports Hamas against Israel, and

has turned its violent and venomous protests against any Jew in America except the "Democrat" Party's large, Jewish donors. At the same time, a "Democrat" administration maintains a tight leash on efforts by Israel's military to rid Israel of terrorist groups like Hamas, which began the current war on October 7th of 2023 by killing 1,200 innocents.

Bowing to the influence of leftist teachers' unions, many public school systems are far more concerned with dispensing **CULTURAL MARXISM** than actually educating **STUDENTS**. After all, the *New World Order* they promote needs a dumbed-down and brain-washed electorate to facilitate their agenda, so serious educational pursuits are rarely a priority unless they happen to involve *Critical Race Theory* or Black History Month. The Moline, Illinois Public Schools even permit an after-hours "Satan Club," and several California public schools pray to the Aztec God of human sacrifice.

It was probably inevitable that the left would eventually redefine **abortion** as "*reproductive care*," in order to distract the public from the horror of government-sanctioned and subsidized infanticide. This was particularly true once "*Democrats*" began acquiescing to rabid feminists by endorsing the late-term and full-term murder of perfectly healthy and innocent unborn babies. In the twisted and fevered minds of leftists, the **INNOCENT UNBORN** can be killed on a whim, but **BLOOD-THIRSTY MURDERERS** must never receive capital punishment.

Another baffling example of twisted priorities is the left's obsession with **"TRANSGENDERISM,"** an enthusiasm not shared by **NORMAL PEOPLE.** This is evident where cowards in authority have allowed *"transgendered"* males to compete against biological females in athletic competitions, where these *males* often dominate. Victory is literally stolen from girls and young women who have trained much of their lives to compete in their sport, and often experience injury at the hands of males. Many public school systems have also been bullied into sponsoring **"GENDER COUNSELING,"** where even young kids are encouraged to question their sexual identity without the knowledge or consent of **PARENTS.**

The left's greater concern for **DIVERSITY** than **MERIT** was exposed by the Biden Administration's selection of many high-ranking appointees. The latter included: A venomous and empty-headed black woman as Vice President; A *"Transgendered,"* Four Star **Rear Admiral** as the *Deputy Secretary of Health*; A cross-dressing **queer** who stole women's clothing while heading the federal office that disposes of nuclear waste; A **queer** as **Secretary of Transportation**, who took *"maternity leave"* for two months while the nation experienced a series of transportation crises; And a nigro Secretary of Defense who secretly disappeared for two weeks to have surgery, but wasn't even missed.

**The Biden Administration *Freak Show***

Finally, the way "*Democrats*" treat the labor force exposes its preference for those who **DON'T WORK** over those who **DO WORK**. To impose its socialist agenda, "*Democrats*" have intentionally harmed the working-class to make it more dependent upon the federal government, much like welfare beneficiaries. For instance, "*Democrats*" enthusiastically "*outsourced*" our manufacturing base and many middle-class manufacturing jobs to China. Likewise, their war on oil and gas by favoring **green energy industries** created hardships for working class Americans by doubling gasoline prices. And, inflation has been devastating to food prices. The Biden Administration has made it more convenient to leave the workforce and receive welfare than to work.

Meanwhile, political allies on the left -- such as the plutocrats of social media -- were granted political favors like immunity from Anti-Trust litigation, in exchange for censoring conservative opposition on their platforms, and for contributing millions in "*bundled*" campaign contributions to the "*Democrat*" Party.

**The same dolts who are responsible for willingly promoting such grotesquely twisted priorities are currently blaming each other for their losses on November 5th. They would do well to heed the wisdom uttered by *Pogo*, a cartoon character from the "*funny pages*" back in the day. In the immortal words of *Pogo*, "*We have met the enemy and he is us...*"**
