

They *NEVER* Let You Down

by Earl P. Holt III

Four members of the species *Africanus criminalis* have been indicted on federal corruption charges in Jackson, Mississippi. There's absolutely nothing unusual about that, except that they happen to be Jackson's mayor, its county DA, a City Council member and the Council's president.

Somehow, the FBI found time to pursue investigations unrelated to its persecution of Donald Trump and his advisors and supporters. It seems that FBI Agents -- posing as real estate developers -- approached these four city officials with a scheme to develop a valuable parcel of vacant land in downtown Jackson. They offered these n*ggers tens of thousands of dollars in bribes to "*grease the skids*" for this deal, and all four took the bait like a trout to the fly.

Jackson's Mayor is **Chokwe Lumumba**, a "*Democrat*" first elected in 2017, who is charged with conspiracy and bribery. In addition, Hinds County District Attorney **Jody Owens**, is charged in the indictment with perjury, and City Council President **Aaron Banks** was also indicted on bribery and conspiracy charges. Quite naturally, all three pled not guilty.

Chokwe Lumumba, Jody Owens, Aaron Banks, & Angelique Lee

Mayor Lumumba and Aaron Banks are alleged to have accepted \$50,000 in campaign contributions as a bribe. For his participation, Banks also demanded a security detail and a job for a family member. **Angelique Lee** is a former City Council member who resigned her seat this year, and pled guilty to the charge of conspiracy to commit bribery.

This is just the most recent scandal to tarnish the image of Jackson, a nearly all-black city of 150,000 that was well-governed and prosperous before it was destroyed by the incompetence and corruption that accompanies *Africanus criminalis* in elective office. In return for their deficient judgement in electing their public officials, Jackson's residents have paid a steep price in the form of terrible city services.

In 2022, Jackson's residents were without a functioning municipal water system for many months, due to a lack of both proper maintenance and preparedness on the part of incompetent black city officials. Then in 2023, the city's residents watched their garbage and trash accumulate for two weeks while Mayor Lumumba and the *Jackson City Council* fought over which business was to receive the city's contract for trash collection.

What this unseemly situation **REALLY** illustrates is the intellectual and moral deficiency of most blacks, who are too stupid and dishonest to avoid electing to public office the most corrupt and greedy n*ggers they can find. **NOTHING** controlled by blacks will ever improve, and the large, urban areas they dominate will continue to decline until they reach conditions like those found in Haiti or similar shit-holes.

Simply stated, it's impossible to maintain a First World system of government with Third World people. It's also often said that "**You can take the n*gger out of the jungle, but you can't take the jungle out of the n*gger.**"

It should be added that you can't eliminate its criminality, either.
