

## **"Democrat" Party, R.I.P.**

by Earl P. Holt III

The evolution of an alternative news media (*Alt-News*) in America has meant that the fake news media can no longer dominate news cycles with phony *narratives* that monopolize reportage and opinion. For the first time, *Alt-News* provided the electorate with real opportunities to compare its more accurate and honest reportage against that concocted by the fake news media. With real alternatives for the first time, fake news fared poorly in comparison.

**Most of the electorate quickly came to realize that our southern border WASN'T "secure," inflation WASN'T "transitory," violent crime WASN'T declining, COVID lock-downs and vax mandates WEREN'T beneficial, and Hunter Biden's laptop WASN'T "Russian disinformation." Most people also came to recognize that "Democrats" HAVE aggressively weaponized law enforcement, they HAVE created a two-tiered system of Justice, and Joe Biden WAS clearly in a vegetative state for four years and NOT in charge of his own presidency.**

These revelations exposed the fake news media to be feverish partisans as well as pathological liars, and hardly the objective and unbiased arbiters they pretend to be. Hopefully, such a betrayal will be remembered for a generation or more. Once it was **exposed** as a mere conduit of disinformation from the **Democrat National Committee**, the fake news media soon found itself in a situation where it could no longer effectively run interference for "Democrats" because it was no longer trusted by most thinking Americans.

Meanwhile, Elon Musk's purchase of **Twitter** and its conversion to "**X**" meant that this extremely popular social media platform was lost to "Democrats" as a device to censor its political opposition and spread

disinformation. It is now owned by someone who aggressively defends free speech, and someone who not only *talks-the-talk*, but *walks-the-walk*, as well. Under its former ownership, **Twitter** was coopted by the Biden Administration in an unconstitutional and criminal conspiracy to censor political opposition, even when that opposition happened to be a recognized authority on the subject at hand.

**Twitter, Elon Musk and "X"**

Further contributing to the party's decline, "*Democrats*" and their fake news media allies have mindlessly persisted in advocating extremely **unpopular policies**, often opposed by 80 to 90 percent of the electorate and favored by as few as 10 or 20 percent. Among these are such policies as allowing biological males -- masquerading as "*transgenders*" -- to compete against females in athletic competitions, while sharing their restrooms and locker rooms. Another one of those 80/20 issues is so-called **gender counseling** of grade school kids without parental consent.

Meanwhile, even Ray Charles could see that taxpayers and businesses were fleeing **BLUE** states in droves for the **sanctuary of RED states**. When polled, most cited high taxes, burdensome regulations, terrible public schools, and inadequate and incompetent provision of city services. Meanwhile, illegal aliens were not only welcomed in such

places, they were wined and dined and often housed in **FIVE\*STAR** luxury hotels at taxpayers' expense. In New York City, alone, illegal aliens are estimated to have absorbed \$13.6 Billion in federal and local tax revenues.

### New York City Luxury Hotels

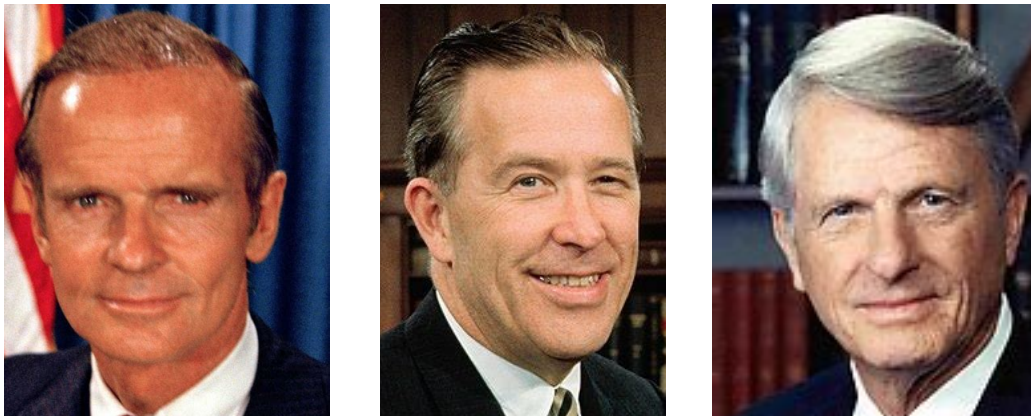

**"Nothing Is Too Good For Our Illegal Aliens"**

Also, brighter members of the **union rank-and-file** learned to ignore the lies of their union bosses and secretly voted for Trump. Many eventually realized that the prestige of their union bosses comes primarily from their ability to deliver campaign donations and union "*bloc*" votes to "*Democrats.*" It didn't take a clairvoyant to recognize that, as president, it was Donald Trump who would improve the prospects for the middle-class, particularly steel workers, auto workers, the home-building trades, the *Teamsters*, and manufacturing in general. This erosion of this previously reliable *bloc vote* has dealt a crushing blow to the DNC.

Another 80/20 issue where "*Democrats*" find themselves out-of-touch with America surrounds the new **Department of Government Efficiency** (DOGE) headed by Elon Musk. These unpaid volunteers have exposed over \$150 Billion in ludicrous expenditures of tax money in only two

months. For example, Biden's ***Agriculture Department*** spent \$600,000 to study the menstrual cycles of "*transgender*" pot-growers. Despite DOGE's vitally needed role, "*Democrats*" have viciously and violently obstructed their reform efforts. Eliminating frivolous grants to dubious non-governmental organizations has shut down the *quid-pro-quo* **money-laundering scheme** that used to lavishly fund "*Democrat*" political operations.

For 50 years the "*Democrat*" Party has been guided by a Cultural Marxist playbook intent on "*re-inventing*" America and the West. In the 1980s, the presence of a few honorable statesmen in the party -- like Wisconsin Senator Bill Proxmire, Washington Senator Henry "*Scoop*" Jackson, and Georgia Governor Zell Miller -- helped to moderate the party's Marxist drift. Unfortunately, those men are long gone, and there are no longer any adults remaining in leadership positions in the "*Democrat*" Party. Moreover, the party no longer possesses any bedrock moral or ethical principles beyond an insatiable quest for political power.

**Bill Proxmire, "*Scoop*" Jackson and Zell Miller**

With adults like Proxmire, Jackson and Miller in office, it was often possible to forge reasonable, bi-partisan coalitions around America's national security posture and fiscal policies thanks to their decency and

statesmanship. At that time, the Marxism that now dominates the party was in its infancy, so America's national security interests and economic policies were often ably met. Now, however, the vast majority are rabidly anti-American traitors, who appear giddy at the prospect of America's destruction at the hands of China, Islam, fellow communists, Third World garbage, or financial insolvency.

In 1974, Bill Buckley stated in his book *Four Reforms* that (paraphrase) **"the 'Democrat' Party is the greatest obstacle to good government in American History."** Buckley wouldn't even recognize its current reincarnation as the ***New Communist Party of the USA***. However, if the "Democrat" Party should happen to fragment into a number of minor parties, Buckley would definitely have recognized that **"Nothing became it in life like the leaving..."**
