

The Curse of Immigration

by Earl P. Holt III

The expanse between the political class found in Western nations — and we serfs over whom they rule -- has become a chasm so wide there's no longer any room for compromise. Nowhere is this divide greater and more obvious than with the issue surrounding mass importation of Third World immigrants into Western nations.

The agenda of our political class is to erase borders among Western nations by swamping them with legions of low-wage immigrants to disenfranchise the white, middle class workers found in the West. This will generate an unemployment "*crisis*" that will prompt a demand for intervention by Western governments to resolve it. **Our political elite will fatuously argue that without national borders, people become "world citizens," and world citizens need a world government.**

Thanks go to Richard Gardner, who candidly described their program as "*an end-run around national sovereignty*" in a 1974 article appearing in **FOREIGN AFFAIRS**, a publication of the **Council on Foreign Relations** (CFR.) The CFR is an American variant of a Marxist society founded in England, which preaches that national boundaries must be discarded and replaced with an *Orwellian*, one-world government that doesn't acknowledge individual nation-states.

The "**Great Replacement**" is the second stage of this cabal's program to eradicate and replace the primarily white and Christian middle class found in many Western nations. Its first phase was the "**off-shoring**" of millions of middle class manufacturing jobs through NAFTA and GATT. Its second phase is the unprecedented invasion of Western nations with endless waves of **Third World immigrants**. For America, this has meant a *tsunami* of illegal immigrants from primarily Latin nations. For Europe, it has meant millions of dangerous black and Moslem immigrants from Africa and the Middle East.

Unvetted immigrants have created a worldwide crisis, because they often harbor legal systems, religions, ideologies, cultures and practices that are incompatible with those prevailing among the Western "*host*" nations they've invaded. Likewise, they often become parasites who refuse to assimilate by learning the language or adopting the customs, laws and values of their hosts. Among Moslems who continue to practice *Sharia* within Western nations, some still engage in "*honor killings*" of family members who violate *Sharia*.

Intact borders permit a nation's legal system, cultural heritage, language, religious traditions and sovereignty to remain intact and undefiled. They promote a unified sense of **national identity** and common purpose that allows a nation experiencing an existential crisis

to unite in a common undertaking, as America did during World War II. However, a society composed of diverse ethnicities -- with divided interests and lacking any common culture or ethos -- is inherently unstable and can be easily divided and subjugated. (*"And if a kingdom be divided against itself, that kingdom cannot stand."* Mark 3:24, KJV.)

This globalist agenda of our Western political elites may be the most comprehensive program for one-world, Marxist government ever devised. It is a conspiracy advanced by the fake news industry, by elected officials harboring Marxist sympathies, and by scheming globalists from the CFR and other *Non-Governmental Organizations* that feel mostly contempt for the West's pluralistic, democratic institutions. Participants in this conspiracy seem giddy at the prospect of serving as commissars in the *New World Order*" and its one-world government.

Their scheme to displace middle class whites is now in full swing, and supported by many ostensibly "*democratic*" political parties and governments in America and Europe. Trash from the Third World make a reliable voting block for expanding the power of any central government, since they bring with them truly inexhaustible needs and demands requiring government initiatives.

Thus, America's so-called "*Democrats*" have been pleasantly surprised by the utility of illegal immigrants from Latin America: their original plan to welcome hundreds-of-thousands soon morphed into the 21million they intentionally admitted between 2021 and 2024.

"*Democrats*" have every intention of granting citizenship and voting rights to every illegal immigrant in America. They won't admit this, but it's the reason they've worked so diligently to encourage and welcome unvetted mass immigration. Granting voting rights to the 21 million foreign nationals illegally residing in America will dramatically alter America's demographics, and subvert our legal system and electoral system beyond repair. In the U.S., we have already experienced the strain from voter fraud engaged in by illegal aliens in 2020.

The endless needs and demands of Third World immigrants leave them vulnerable to seduction by whorish politicians who will promise the world in exchange for their electoral support, much as "*Democrats*" have done with welfare handouts to blacks, or promises of student loan "*forgiveness*" to college students. If not opposed, it will usher in international socialism and bring an end to our two-party system, although most "*Republicans*" on the subject of immigration have been as useless as birth control at a lesbian convention.

Sweden is just one of many European Nations that are at risk of losing their distinctive cultural identity. That nation's foolish decision to provide sanctuary to a million Moslems from Africa and the Middle East has been catastrophic for its native-born populations and its legal system. It has unwittingly become a living vindication of Jean Raspail's dystopian novel, *The Camp of the Saints*. Swedish police have been forced to designate several dozen areas within Sweden as "**vulnerable areas**" -- a euphemism for "**dangerous**" -- because of their extremely high rates of rape, murder and other violent crimes.

These are areas dominated by Moslem immigrants from Africa and the Middle East, many of whom are scofflaws that ignore Swedish Law and observe only *Sharia Law*. Although Swedish officials discourage use of the term, these *vulnerable areas* are often referred to in other Western Nations as "**No-Go Zones.**" Similar areas exist in Belgium, France, Germany, Italy and Spain, each of which has welcomed waves of African and Middle-Eastern immigrants.

The greatest danger facing the West is not "**global warming**" or even global *Jihad*, it is the **betrayal** of the citizens residing within Western nations by their own elected officials. This is being accomplished on

behalf of wealthy globalists pursuing international socialism in the guise of a benevolent sounding *"One-World Government."* They actively work to destroy Western democracies by obliterating national boundaries and the unique and distinctive legal systems and cultural traditions which national borders preserve.

Multiculturalism and ethnic diversity haven't worked out so well in the past. Only fools and rabid professional sports fans would argue that racial diversity has been beneficial to America. In fact, it has spawned unprecedented rates of murder and other crimes by a morally and mentally deficient race, incapable of adapting to a modern society. That particular malignancy grows angrier, more aggressive, more covetous, and more parasitic with each passing decade.

Many years ago a Southerner writing to William F. Buckley at *NATIONAL REVIEW* summed-up the curse of multi-culturalism and one-world government more succinctly and pithily than just about anyone else has done, before or since. He wrote: *"I have little enough in common with the people of New York, let alone Uganda."*
