

Ending Political Assassinations

by Earl P. Holt III

There's only one way to minimize political assassinations in America, and it doesn't involve infringing on the Second Amendment. It requires forcing news media organs to **COMPETE** against each other for news stories and public trust, rather than continue to **COLLABORATE** with each other by parroting identical falsehoods to benefit their ideology.

For ten years, we've listened to lying scumbags in the Jews' Media call Donald Trump "**Hitler,**" and claim that he's "**a threat to democracy.**" Trump's supporters in the MAGA movement fared only marginally better from these douchebags, and were often referred to as "**fascists.**" The cumulative effect of *dehumanizing* conservatives and Republicans has been two assassination attempts against Trump, the successful assassination of Charlie Kirk, and a nearly-successful attempt against Congressman Steve Scalise (R-LA-01.) The Jews' Media did the same thing to Reagan in 1981, and came even closer to getting *The Gipper* assassinated than they did Donald Trump in Butler, PA.

Until Rush Limbaugh's untimely death, whenever an important news story broke he would play sound bites on his radio show from the Jews' Media's network and cable news outlets that reported it. His purpose was to expose how each supposedly "*independent*" media organ repeatedly used identical phrasing in their reportage, strongly suggesting that the same memo had been sent to each of them, directing them to adopt a specific narrative. Later, their *talking heads* who masqueraded as "*journalists*" obligingly parroted the identical contents of each memo.

A relentless bombardment with fraudulent narratives like theirs can become *reality* to those who aren't capable of thinking critically. Author Tom Wolfe argued that each time you hear a given message, it forms a protein structure in your brain that becomes a memory or "*meme*." So, if you hear the same message often enough, it eventually morphs into a closely-held belief. This phenomenon must have been what NAZI Minister of Propaganda, Joseph Goebbels, recognized when he declared that "*if you repeat a lie often enough, people will believe it.*"

The phenomenon of the Jews' media speaking in a single voice has been a persistent pattern for decades. But the problem isn't just the lies they knowingly report as fact, it's also the stories they conspire to censor by refusing to investigate or report them. This practice of **"filtering"** news is motivated by a desire to withhold potential ammo from political adversaries. However, it keeps the Jews' Media's consumers oblivious to a lot of evidence that might otherwise cause them to reexamine their political allegiances. It has created an enormous gap between what consumers of *"alternative news"* often know, and the filtered version that's rationed to those foolish enough to still trust the Jews' Media.

Clearly, there is something going on in what has become America's corrupt and leftist news media. The answer lies in the fact that the vast majority of the U.S. news media is held by a small oligopoly of five media holding companies, all of which are either owned or run by left-of-center Jews. The five are **Comcast** (Revenues of \$124 Billion in 2024,) **AT&T** (\$122 Billion in 2024,) **Meta** (\$165 Billion in 2024,) **The Walt Disney Company** (\$91 Billion in 2024,) and **Paramount** (\$29 Billion in 2024.)

Comcast owns **NBC**, **MS-NBC**, and many small cable channels. **AT&T** owned **CNN** from 2018 until it was wisely sold off in 2022. **Meta** owns **Facebook**, **Instagram**, **Threads**, **WhatsApp** and **Messenger**, where many gullible kids under the age of 30 get their news. The **Walt Disney Company** owns **ABC** and several smaller cable channels. **Paramount** owns **CBS**, and some small cable channels.

Brian Roberts is the Jewish CEO and Board Chairman of **Comcast**. Mark Zuckerberg is the Jewish Chairman and CEO of **Meta**. There has been a succession of Jews who served as CEO and Chair of the **Walt Disney Company**. There has also been a succession of Jews serving as CEO and Board Chair at **Paramount**. (While **AT&T** doesn't appear to be run by Jews, the CEOs of its subsidiaries definitely are: Steve Asbell and David Greenbaum are co-CEOs of **20th Century Studios**; Kevin Feige is CEO of **Marvel Studios**; and Matthew Greenfield is CEO of **Searchlight Pictures**.)

This concentration of power in the hands of a small oligopoly of companies run by leftist Jews explains how the Jews' Media has literally evolved into what President Trump correctly calls *fake news*. Their leftist politics dictates the content of news narratives, and often subtly influences the ideological and political content of movies and other forms of entertainment created by subsidiaries they own and control. This phenomenon explains how a memo from some anonymous Pharisee can be immediately distributed to fellow oligopolists, and dictate the very *talking points* to be used in their prime-time broadcasts.

The rot within the fake news media is a malignancy that has aggressively metastasized over the years. It has perpetuated treasonous lies to damage its enemies, like Trump's "*Russia Collusion*" charges. It also *spiked* the Hunter Biden laptop scandal immediately prior to the 2020 election, and long afterward. It cheered corrupt prosecutors in Trump's *show trials* based on phony charges. Most egregious of all, it ignored mounting evidence of the **Biden Family's** sale of influence to communist China, which left Joe Biden vulnerable to China's extortion. It also closed its eyes to Joe Biden's vegetative state.

There is no substitute for the U.S. Justice Department bringing charges of anti-trust against the Jews' Media's oligopoly, and forcing their breakup and the divestiture of their subsidiaries. Every organ of the

Jews' Media will scream bloody murder and allege anti-Semitism because they're happy with their oligopoly and the *status quo*. However, endless examples of Jews' Media talking heads -- using identically worded narratives -- should be compelling evidence. America must dismantle the Jews Media oligopoly, just as the DOJ successfully deconsolidated the steel, oil and telecommunications industries in the 20th Century.

What America received in return for 20th Century antitrust litigation was greater competition within these industries, and greater consumer sovereignty. The same benefits would accrue to American consumers of news. With more accurate news reportage, there should be fewer aspiring political assassins motivated to murder Americans based on the lies and defamation concocted by *fake news*.
